# Platform Security

The best defense is a good offense. Platform Security offers you unrivaled capabilities to detect and protect against modern threats.

70% of companies that host data workloads in the cloud have experienced a breach of their public cloud environment in the past year*. Threats are always evolving, so traditional security is no longer sufficient for protecting critical data and applications. These measures need to be incorporated into a comprehensive multi-layered security solution that is fully monitored and regularly optimized. We protect your on-premise and cloud workloads so you can focus on expanding your business.

With Microsoft's cloud-based advanced security solutions, Cognizant Microsoft Business Group (MBG) can prevent, detect, investigate and respond to the latest threats in a fraction of the time.

**Azure Sentinel**

**Azure Security Center**

**Microsoft Defender for Endpoint**

**Microsoft Security Expertise**

|---|---|---|---|
| **Prevent** | **Detect** | **Investigate** | **Respond** |

Cognizant MBG's Platform Security managed service provides cloud-based, complete end-to-end security for your critical infrastructure platforms, wherever they are. Leveraging the complete range of cloud scale security solutions from Microsoft, you can be secure in knowing your valuable data is safe and protected, 24x7. Microsoft's Cloud security suite analyzes 8 trillion signals per day to monitor for threats against your environment**. The Cognizant MBG works with these indicators on your behalf, utilizing our extensive expertise with Microsoft's security technologies to secure your platform.

### Azure Sentinel
Cloud native AI-based SIEM and SOAR reinvented for a modern world. Azure Sentinel correlates alerts, automates actions, and enables proactive threat searching capabilities, making threat detection and response smarter and faster.

### Azure Security Center
Hybrid security management and threat protection leverages a powerful behavioral analytics engine that continually assesses your IaaS, PaaS, and on-premises workloads. Improve the security posture of your critical infrastructure with actionable recommendations and threat detection.

### Microsoft Defender For Endpoint
Next-generation protection for server platforms that defend against advanced threats and malware by bringing together machine learning, behavioral analysis, and in-depth threat resistance research.

### Prevent, Detect, Investigate and Respond
The Cognizant MBG Platform Security service integrates with, optimizes, and augments the Microsoft Cloud security technologies protecting your infrastructure. Our experts continually investigate and respond to detected alerts and act on your behalf to keep your data, application, and infrastructure platforms secure 24x7.

## Engage with the Cognizant MBG to safeguard your business-critical infrastructure platforms with focus, simplicity and scale.
