

Microsoft Azure Services

Azure Active Directory
(Azure AD)

Cognizant provides engineering and managed services to implement comprehensive cloud identity and access management (IAM) solutions leveraging Azure AD for enterprises. With extensive experience in migration and transformation initiatives on Azure, Cognizant offers a focused set of services around Azure AD for seamless application integration and end-user navigation.

Enterprise scenarios delivered by Cognizant:

- **Hybrid identity solutions** include common identity across on-premises/cloud
- Identity life cycle and provisioning
- Unified **multichannel authentication** and single sign-on (SSO) for cloud, mobile and on-premises applications
- Empower and protect users with multifactor authentication (MFA), conditional access and contextual identity protection
- Discover and protect privileged administrators (Azure PIM)
- Monitor and audit access to privileged roles and critical assets (Azure IG)
- B2B and B2C collaboration integration
- Third-party IAM integration using SailPoint, CyberArk, Ping Identity

Delivery excellence

- Enterprise **Office 365 migration** with robust IAM security controls, including identity sync, authentication, SSO and MFA
- Experience with Microsoft Identity Manager, ADFS and Azure AD connect for **hybrid, bi-modal IAM** deployments

- Large **resource pool** across the globe offers dedicated and managed services

Time to market

- Readily available **architecture blueprints include hybrid identity, legacy and software-as-a-service** applications integration and MFA enablement
- **Solution accelerators** include bulk enrollment of MFA factors, a proprietary app for Splunk integration, a CyberArk integration approach and third-party biometrics integration
- **Managed**, onsite-offshore model provides efficient and 24x7 coverage

Cost savings

- **Reusable**, proprietary Azure AD **value-adds** reduce engineering cycles and improve operations efficiency
- **Managed services support** includes ticket-based pricing
- **Integrated delivery** for implementing Azure native security controls, including identity and access, data, infrastructure and risk compliance

Why customers choose Cognizant

- Unified identity as a service (IDaaS) platform across the identity life cycle and access management use cases for enterprises
- Single platform to manage all employee, partner and customer identities at large scale
- Enhanced identity and access security controls for cloud-centric, on-premises and Hybrid customers
