

Upgrade PLUS Assessment

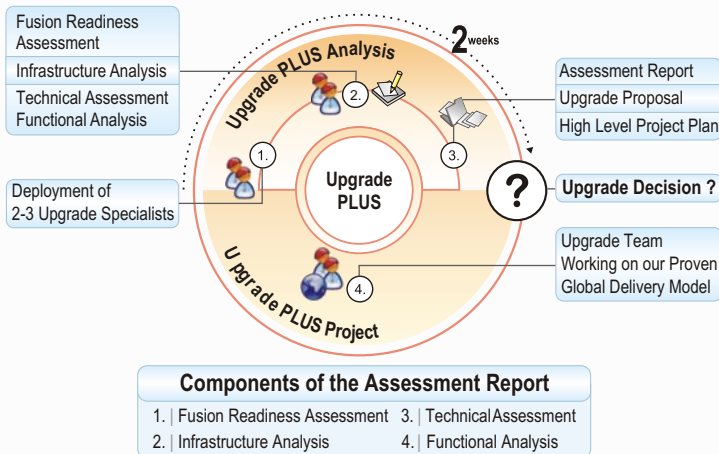

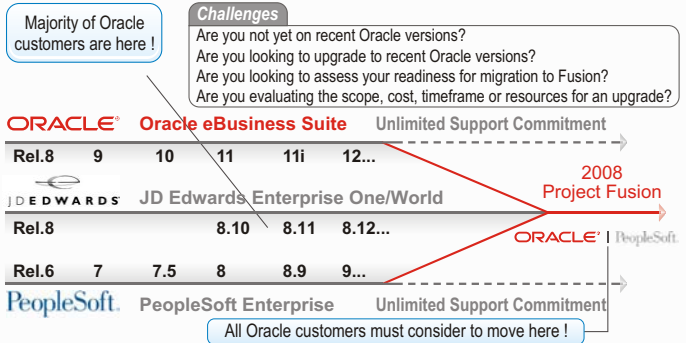

Analyse to Upgrade your PeopleSoft, Oracle E-Business Suite, JD Edwards Applications in the Fusion World with Cognizant's Upgrade PLUS

Challenges for Oracle Customers in the Fusion World

The complex landscape of ERP Upgrades is further complicated by the need to take on pre-fusion planning. Simply upgrading Oracle Applications is no longer valid in today's complex environment that will eventually lead to Oracle Fusion Suite.

What's more, Oracle might encumber functional enhancements of PeopleSoft, JD Edwards Applications in future.

Cognizant's Solution

Cognizant Oracle Practice's consulting arm in their endeavor to drive client's business growth, strengthen client's business processes and harness the information that makes the business unique and competitive, provides high end consulting services to the Oracle Customers.

Oracle Fusion Portfolio Assessment (OFPA) is the flagship service offering of the consulting arm providing end to end assessments to create a roadmap for organizations to adopt the Oracle Fusion Suite. The key assessment under OFPA is the *Upgrade PLUS Analysis (1st Phase of the Upgrade PLUS Solution)* which using the specially developed in-house tools, provides the assessment of PeopleSoft, Oracle E-Business Suite, JD Edwards Applications for the level of effort required to upgrade, readiness to adapt to Fusion infrastructure and the level of customization through a comprehensive report at the end of the assessment.

Cognizant's Upgrade PLUS Tools enhance performance

Analysis Tool: This tool quickly and effectively analyses customizations at module level and provides useful data to perform Impact Analysis. It is flexible and easy to use

Compare Tool: This tool is used to find of the level of customization in the current version as compared to vanilla version. This tool delivers a CSV file detailing the list of customized objects and summary detailing the level of customization for each object type.

Filtration Tool: This tool reduces the size of database by keeping the representative data. Usage of this tool will reduce the time required to perform the initial and test passes.

Upgrade PLUS Framework

Phases	Upgrade PLUS Analysis	Upgrade Project
Activities	<ul style="list-style-type: none"> Fusion Readiness Assessment Infrastructure Analysis Technical Assessment Functional Analysis 	<ul style="list-style-type: none"> Assess and Design Construction Transition Testing Deploy
Deliverables	<ul style="list-style-type: none"> Assessment Report Upgrade Proposal High Level Project Plan 	<ul style="list-style-type: none"> Upgraded PeopleSoft System
Key Differentiator	<ul style="list-style-type: none"> Fusion Readiness Assessment Accurate Effort Estimation Objective evaluation of existing environment 	<ul style="list-style-type: none"> In-house Developed Upgrade Toolset Global Delivery Model Quick Resource Ramp Up
