

## By Your Side: New Levels of Support for the Worldwide Temenos Community

### Temenos Adds Real Strength in Services

While there's every sign that the economic recovery is under way, that's not enough to put smiles back on bankers' faces. Vivid memories of 2009's headlines are ample reminders that the management of risk must remain a top priority. Competitive pressures mean there can be no let-up in banks' efforts to reduce costs. Agitated regulators and policymakers are leaning heavily on the sector. Bankers also have to plan for growth, ensuring that their core banking systems can scale up as they plan to enter new geographies or expand through acquisition.

### Temenos Brings Reinforcements to Help Banks Excel

Since 1993 Temenos Group AG has been helping banks succeed. Of late, the global financial crisis has made the business of banking far more difficult. It's not just that credit demand remains weak and deposits have shrunk; it is also that coping with the combined pressures to contain costs, plan for growth, manage risk and stay current with regulations is more than should be expected of any software solution.

If banks are to thrive in this environment, they need an encompassing suite of services that enable smooth software upgrades, provide training, take care of business analysis and much more. With

those services in mind, Temenos has teamed up with Cognizant Technology Solutions, a leading provider of information technology, consulting and business process outsourcing services.

### Benefiting from the Cognizant Effect

Cognizant has exceptional strength and experience in banking and financial services, together with a rich ecosystem of technology partners whose

We believe this partnership will add to the breadth and depth of our capabilities in banking and financial services technology and operations, and create a compelling proposition to our joint customers.

— Rajeev Mehta, Chief Operating Officer, Cognizant

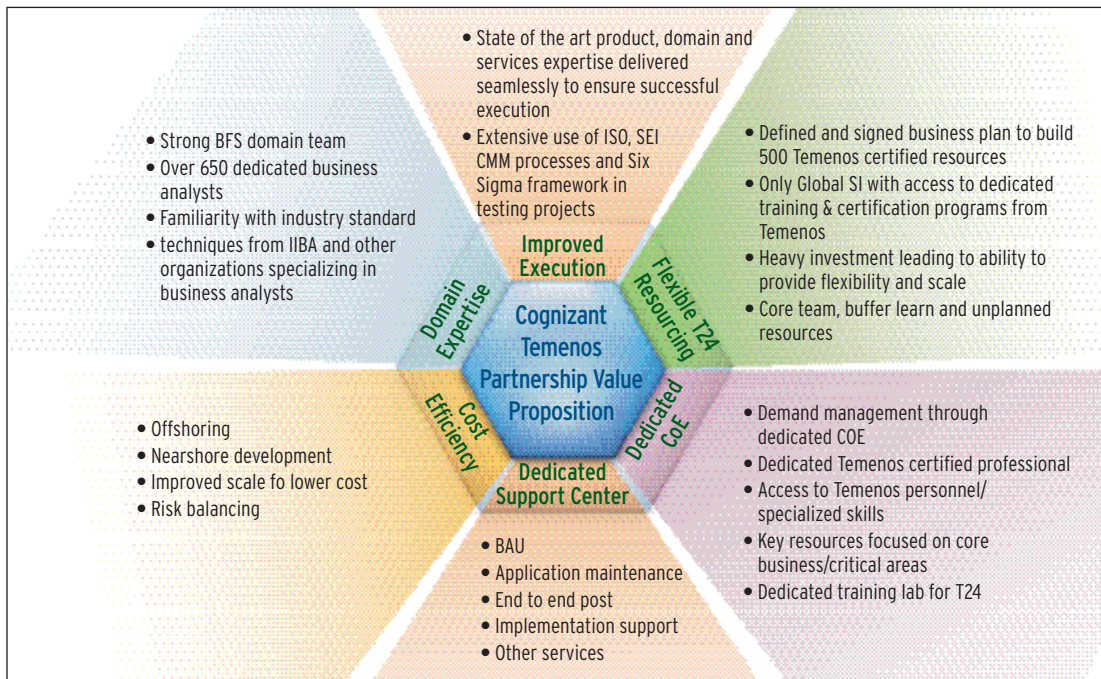

Figure 1

industry-leading products add value in discrete financial markets. As Temenos' first and largest global strategic integration partner, Cognizant's objective is to deliver more value to Temenos customers by significantly reinforcing Temenos' service and delivery capabilities worldwide. Cognizant will provide premium service offerings through its global delivery centers in the Asia Pacific, Europe and Americas regions and across the rest of the world.

With Cognizant, you get:

All the leverage of a dedicated global provider of project services—from T24 implementation and upgrades to business process consulting.

- Faster T24 implementations with tight budget control.
- Additional competencies in banking and financial services.
- Tightly controlled project risk.
- A wide range of upgrade services.
- Ability to take advantage of a balanced onshore/offshore cost and delivery model.

- Superior risk management and partnership governance during implementations.
- Improved project ROI, from planning to post-live support.

#### What Temenos Users Will Experience

The partnership involves strategic cooperation in business requirements analysis and gap analysis; implementation of Temenos software; version upgrades; testing; and legacy data migration. Temenos will remain involved in all projects in a number of important ways. As the supplier of the preconfigured Model Bank, for instance, Temenos will remain the developer of customer extensions. The company will also continue to develop tools for supporting installations and upgrades, as well as provide customer support for its software. Cognizant will complement these services with project management, business analysis, testing, infrastructure readiness/support, training and upgrades, as well as extended customer site support.

In its unique position as Temenos' first and largest global strategic integration partner, Cognizant has invested substantially in the Temenos mar-

marketplace. The service provider has assembled the largest dedicated T24 workforce to deliver implementations using its proven global delivery model. And Cognizant and Temenos have established a global Center of Excellence that benefits from the consistent involvement of senior managers from both partners.

Cognizant and Temenos are rapidly extending their collaboration in the Temenos marketplace. By late 2011, hundreds of customers will be experiencing the benefits of new developments such as a managed test center and an integrated product help desk.

If it's something that helps put a smile back on a banker's face, Cognizant and Temenos are already working on it – together.

Find out more about how the new Temenos-Cognizant partnership can help your bank excel in the post-downturn world.

**As we continue to experience growth in our license sales, despite the difficult economic environment, and traction within Tier 1 banks for packaged core banking software, we need to be able to ramp up our services capability faster than we have been able to do until now.**

**I am excited at the prospect of working together with Cognizant and the benefits that this alliance will bring both Temenos and our customers.**

*— Andreas Andreades, CEO Temenos*
