

Faster. Better. Cheaper. Together at last.

Most consultants will say that you can have two of the three most desired qualities in application engineering: faster, better, or cheaper. With Cognizant Oracle Retail you can have all three. Starting today.

Oracle Retail is the software application of choice for retailers worldwide because there is nothing more powerful. But implementation can be challenging. And costly. With Cognizant, you don't have to worry.

We have a long track record of excellence with major retailers. You can count on a first-rate Oracle Retail implementation, matched precisely to your business, executed in less time and for less cost.

You'll strengthen your business in all the ways that matter: merchandizing, robustness, supply chain agility, data integrity, and a better experience for your customers. You'll drive profitability from rack to checkout, with all the advantages of the connected enterprise.

Not just a practice, a passion.

We are retailers. No other competing firm can make that statement with the same conviction. Eight of every ten onsite Oracle Retail associate come from senior positions in retailing. We know your business (and your pain) in ways that non-retailers cannot. Our methods are based on your realities.

Plus, we have a decade of Oracle Retail application suite experience across every version and module. We helped write parts of the original Retek versions. And we are the Preferred Partner for Oracle Retail University. You simply cannot be in better hands.

Optimal Oracle. End to end.

We do it all – from a single module to an entire retailing system for the largest retailers on earth. What puts us above the fray is *how* we do

it. With Cognizant you get a flexible, cost-effective, high-return, de-risked implementation delivered faster, on time and on budget, by technology trained retail professionals you'll enjoy working with. People like you.

Faster to market. With more assurance.

Cognizant's round-the-clock global delivery system integrates your efforts with ours. Our Delta-V support framework provides game-changing implementation assurance: solution accelerators, automated testing frameworks, and conversion templates that can speed your Oracle Retail implementation by 20% to 50%.

Our "Two-In-A-Box" onsite/offshore engagement governance model provides in-depth local consulting and onsite teams focused on your business.

Top-tier thinking about your bottom line.

Every client should ask this question: Will I get the talent I need once the contract has been signed?

With Cognizant, the answer is yes. At a time when many large consultants are stretching at the edges of their talent pools, Cognizant Oracle Retail has the breadth and depth to ensure your project is staffed only by experts, in retailing and Oracle. The people you deal with every day are 100% focused on Oracle and directly connected to the technicians working on your systems. Implementation is both smart and smooth. And cost efficient.

Faster. Better. Cheaper. Together at last.

Cognizant
