

BLOCKCHAIN IN HEALTHCARE & BEYOND: ARE WE READY?

The Point | 23 January 2019 | 5:00 PM – 6:30 PM

Blockchain's rapid development is impacting economies, enterprise and society. As an emerging shared IT infrastructure, blockchain and distributed ledger technology are shaping the architecture of Globalisation 4.0, as many industries seek ways to democratize access to information in ways that unlock value for all stakeholders.

Reuters, with Cognizant and MetLife Asia, are bringing together experts from the worlds of healthcare insurance, technology and business innovation, to explore blockchain's game-changing potential through real-world case studies, showcasing how technology can enable organizations worldwide to enhance collaboration and trust, as well as reduce operational costs and improve transactional security.

We look forward to hosting you in Davos.
