Cognizant Digital Systems & Technology

Cognizant® WorkNEXT™ Cloud Workspace

Redefining enterprise work environment through Cognizant® WorkNEXT™ Cloud Workspace

Empower your enterprise IT with cloud workspace

Today's business world is witnessing huge shifts in workspace. The new workspace, defined by technology, is a virtual space defined by applications, services and information, available on demand for the employees. Rapid technological developments in cloud native digital workspace is enabling a streamlined workspace strategy to support distributed employees in global enterprises.

Cloud native digital workspaces help in improving performance, efficiency, business productivity, agility and scalability. Enterprises also use the cloud native workspace approach in order to manage and maintain infrastructure automation. The success of shifting to cloud native digital workspace depends on how well it is aligned and customized to the enterprise's use cases or user personas.

With Cognizant® WorkNEXT™ Cloud Workspace solution, organizations can now seamlessly migrate and deliver workspaces to their employees and enable them to work from anywhere, any time and from any device with secured and seamless access to business.

Enable a fast, flexible and secure way to manage your workspaces

With in-built automation and orchestration, Cognizant® WorkNEXT™ Cloud Workspace solution enables single touch provisioning of applications and virtual desktops. Its inherent user experience analytics offers selfheal options to enhance the overall digital experience. It also offers a comprehensive end to-end solution including end-devices such as chrome books / thin clients, productivity suite, data on the go and workspace analytics with a flexible pricing model.

Cognizant's robust delivery includes proven onshore/offshore model with 1000+ AWS, Azure, Citrix and Google certified engineers.

Our unique methodology

Cognizant® WorkNEXT™ Cloud Workspace is an integrated end-to-end solution built on a public cloud platform that delivers desktops and applications

Cognizant®

accessible anywhere, anytime, on any device offered in a 'as–a–service' model.

A comprehensive solution with in–built automation functionalities, intelligent analytics and context aware security policies, WorkNEXT™ Cloud Workspace provide customers with a true digital end user experience delivered securely.

The solution is offered on major cloud platforms such as AWS, Azure and Google Cloud enabling customers with freedom of choice.

AWS Workspaces

AWS Workspaces is a fully managed, secure Desktop as a Service (DaaS) solution which runs on AWS. Virtual desktops are provisioned based on the customer requirements.

Citrix Cloud on Azure/Google Cloud

This solution delivers virtual applications and desktops on Microsoft Azure or Google Cloud Platform (GCP), thereby reducing the overall IT costs and increasing efficiency. By leveraging the Citrix cloud service, all the management components will be deployed on Citrix cloud and only the XenApp and XenDesktop workloads are provisioned on the Azure or Google Cloud Platform, allowing organizations to manage only the workload without worrying about the maintenance of Citrix XenDesktop / XenApp sites.

What sets Cognizant® WorkNEXT™ Cloud Workspace apart?

- Freedom of choice to opt preferred public cloud provider.

- Flexible 'pay–as–you–use' pricing model and on demand scalability.

- Simplified desktop operations and reduced total cost of ownership (TCO).

- Enhanced security through context aware security policies

- Single point of ownership from Cognizant.

Here are a few use cases we delivered using our cloud workspace expertise:

For a European Medical Information Service provider, our solution enabled:

- Improved user experience.

- Improved security and reduced TCO by 30% adopting our pay–as–you–go model.

- Faster and secure on–boarding of any third party contractors to corporate environment.

- Highly available and scalable environment.

For US based healthcare analytics firm, we achieved:

- Reduced TCO, minimized capital expenditure and ongoing operating costs.

- Highly available and scalable HIPAA compliant environment.

- SSO enabled for centralized access control and management.
