You're invited to the future of clinical trials

Cognizant
Shared Investigator Platform

More studies, less stress with Cognizant® Shared Investigator Platform

Cognizant Shared Investigator Platform (SIP) is the industry's only single instance, multi-sponsor, collaborative technology platform for clinical trial site selection, start-up, and management. It offers a single point of access to resources needed to successfully execute multiple studies with multiple sponsors, providing you with more time and more opportunities to participate in clinical research.

SIP delivers the transformational power of sharing to the clinical trials industry. The platform was envisioned and delivered by a passionate group of biopharmaceutical company leaders committed to making life easier for investigators and site staff. It delivers benefits that could only be achieved by a collaborative platform that virtually eliminates the redundancies created when every sponsor leverages separate clinical trials technologies for investigators to use for study management.

Sponsors who elect to use the SIP to run studies agree to share the same site information and leverage the same processes to eliminate many of the redundant tasks associated with site selection, study start up and safety notifications. For investigators and site staff, less is more:

- Less time logging in and out of systems
- Shorter feasibility surveys to complete
- Fewer duplicate CVs and 1572s sent to sponsor after sponsor
- Less time completing duplicate training courses
- More opportunities for new studies
- More time for patients

What is SIP?

Cognizant SIP is a collaborative cloud-based technology platform that reduces the operational challenges of clinical trials by bringing sites and sponsors together in one secure, common solution. A single sign-on provides access to multiple sponsors' site feasibility, study start up, training and and certain key safety communications and activities. Single sign-on via SIP also connects you to many of the other technology platforms that sponsors use to conduct their trials, such as EDC, CTMS, eTMF and payment systems. This eliminates the arduous task of managing the array of username and password combinations and logging in and out of multiple technology platforms every day.

Similar to popular business networks and other collaboration platforms, information about your qualifications and your site's capabilities are entered and updated by you, your staff, your academic medical center administration or site network affiliate. Maintaining data in just one place ensures the most up-to-date information is always available to the expanding network of clinical trial sponsors that are overseeing their clinical trials through SIP.

Exchange information easily with Cognizant Shared Investigator Platform

Among the challenges for clinical trial sites is the technology proliferation that occurs as each pharmaceutical company provides its own systems and applications for each trial they sponsor. SIP is designed to solve that problem by providing a single platform, log-in, and interface to work with multiple sponsors.

Gain the ease of single sign-on

Access all of your clinical trials across all participating sponsors with a single sign-on. Your credentials will be passed to underlying clinical systems such as EDC and IRT associated with your studies, speeding your workflow.

Work more efficiently

Stop responding to a series of ad hoc requests for the same information in different formats. SIP takes advantage of the profiles you create to simplify and reduce the burden of survey responses, document requests, and documenting your training.

Help sponsors find your distinct capabilities

Sites upload details about their facilities and investigators' qualifications. Sponsors search for sites based on the needs of their protocols. The result? New relationships between sites and sponsors and enhanced access to patients for clinical trial participation.

Focus on your patients

The role of Cognizant Shared Investigator Platform doesn't end once your site is selected for a study. It's just the beginning. The solution delivers consistency and harmonization to all phases of clinical trials, helping sponsors and sites start up clinical trials quickly and operate efficiently. With fewer administrative burdens, clinical sites can better focus on patients' needs.

Manage and grow your organization

Cognizant Shared Investigator Platform is designed to support all clinical trials stakeholders, including community practices, academic research organizations and site management organizations that are now able to manage their networks of facilities and investigators within SIP.

Accumulate the benefits

As adoption of the Cognizant Shared Investigator Platform accelerates, the benefits are accumulating for sites and sponsors. SIP is expanding to more and more sponsors, including small and mid-size and large pharma and device manufacturers, along with contract research organizations and technology partners. It's time to get study-ready in SIP and get connected to the future of clinical trials!

INTEGRATION
Out-of-the-box APIs to integrate clinical apps like CTMS, eTMF, etc.

SINGLE SIGN-ON
Secure access across sponsors, studies, and clinical systems

HOME PAGES, TASKS
Dashboards, consolidated tasks across sponsors & studies

USER PROFILE
Centralized site staff info, re-used across studies

SAFETY REPORT DISTRIBUTION
Upload of safety letters, central distribution and notification

FACILITY PROFILE
Centralized facility info, re-used across studies. User associates to facility

Cognizant
Shared Investigator Platform

DOCUMENT MANAGEMENT
Sharing of important documents; workflows, versioning, annotation

STUDY WORKSPACE
Sponsor-specific workspace for each study

TRAINING
Mutually recognized training courses and centralized history

SURVEY
Survey creation, distribution, completion, and response

Get study-ready in the Cognizant Shared Investigator Platform

- **Create a single sign-on.** Access multiple sponsors using Cognizant Shared Investigator Platform.

- **Build a user profile.** Enter data once and maintain your credentials centrally for use across all platform sponsors and their studies.

- **Manage a facility profile.** Complete once for use across all platform sponsors and studies. You can also associate user profiles with it.

- **Set up your organization.** Connect your network of sites, facilities, and investigators to complete feasibility surveys and manage tasks on behalf of your site management or academic research organization.

- **Delegate tasks.** Assign a site administrator to complete tasks under your authority.

- **Participate in mutually recognized GCP training.** Take courses with one sponsor and receive credit from all participating sponsors.

- **Complete feasibility surveys.** Participate in shorter sponsor surveys that take advantage of known information in User and Facility Profiles, allowing you to explore more study opportunities and focus on protocol-related questions.

- **Access your study workspace.** Collaborate with one or more sponsors and multiple study teams in one place.

- **Exchange documents.** Post, share and retrieve study-related documents with study team members safely and securely.

- **Access and acknowledge safety reports** distributed by multiple sponsors in a centralized view.

- **Prioritize and manage your work.** Gain a consolidated view of tasks across studies and sponsors.

More studies, less stress, no fees

Join the Cognizant Shared Investigator Platform and get study-ready. More and more sponsors are preparing their organizations to place their portfolios into SIP. There are no fees for sites, and you can begin the registration process immediately!
