Data Sheet

TriZetto[®] CareAdvance Enterprise[®] and TriZetto[®] QNXT[™]

A unified solution for care management.

The TriZetto[®] CareAdvance Enterprise[®] solution is integrated with the TriZetto[®] QNXT[™] platform to provide:

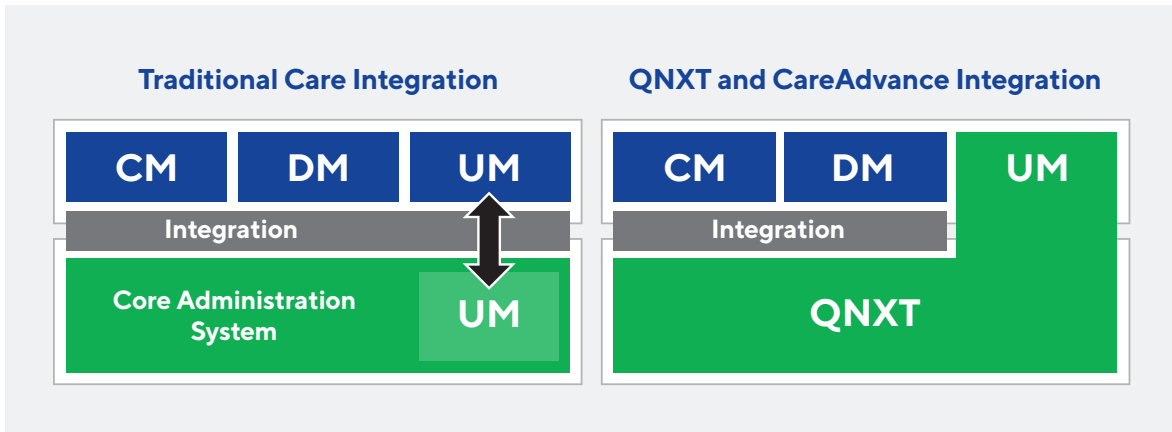

- A single, enhanced utilization management (UM) solution that eliminates complex and costly UM data integration.
- Compatibility with MCG Health, LLC and Change Healthcare InterQual[®].
- Summaries of member HL7 Continuity of Care Documents.
- Seamless access to QNXT workflows for appeals, grievances and UM functionality from within CareAdvance.
- An enhanced analytics rules engine.

The CareAdvance Enterprise application provides unsurpassed care management capabilities for improving outcomes and predictability, and it now has next-generation preintegration with the QNXT software. This comprehensive solution delivers full care management functionality across utilization, disease and case management initiatives.

Realizing the cost savings and quality improvement potential of care management programs requires efficient, thoughtfully integrated applications that connect care managers to members and providers.

CareAdvance Enterprise and the QNXT platforms are part of the Cognizant line of TriZetto[®] Healthcare Products—a portfolio of software products that helps healthcare organizations enhance revenue growth, drive administrative efficiency and improve cost, quality of care, and improve the member and patient experience.

This integrated solution supports compliance requirements and simplifies workflows and processes for care and population health management. With the solution, health plans can deliver targeted health information and wellness campaigns more effectively, while getting the most from member and provider interactions.

An effective approach to integration

Powerful QNXT workflow solutions capabilities can be accessed directly from the CareAdvance platform, which eliminates switching between applications.

Immediate access to additional QNXT functionality, such as the TriZetto® QNXT™ Utilization Management Workflow and TriZetto® QNXT Appeals and Grievance Workflow™ solutions, further supports care management activities.

Health plans will benefit from:

- Increased efficiency via a streamlined, unified CM/DM/UM experience.
- Reduced risk and total cost of ownership through productized integration.
- Eliminating complex UM integrations and ongoing maintenance risks.
- Up-to-date QNXT information views without leaving the CareAdvance software.
- Improved authorization matching and reduced approval risks with real-time feedback from the QNXT platform.

Efficient workflows, improved outcomes, engaged providers

Gain faster, streamlined workflows with these features:

- Consolidated application screens, which allow easy navigation and access to key member information.
- An intuitive interface, which grants access to multiple screens without losing work and information gathered during member assessment and interactions.
- Configurable security, which enables assignment of various levels of authorized access to member profiles and information.

Improve care management program delivery through:

- Accurate forecasting, identification and stratification of members.
- Standard and customized reporting functionality.
- An open analytics platform that can be custom integrated with any advanced analytics solution.

Deliver real-time services to provider communities through Cognizant web services integration—enabling payer-provider collaboration at the point of care.

Reach your objectives faster

In addition to the CareAdvance Enterprise and QNXT solutions, we offer an extensive line of solutions and services that harness the power of digital to optimize your business. Achieve new levels of performance and efficiency with Digital Business, Digital Operations, and Digital Systems and Technology capabilities from Cognizant.
