TriZetto® NetworkX Pricer®

Using precision to overcome complexity

Whether the goal is to better administer medical loss ratio (MLR), better optimize the delivery of care or manage new reimbursement standards for Medicare and Medicaid, payers are increasingly implementing sophisticated contract terms and pricing methodologies in their provider relationships.

Simply reconfiguring outdated payment processes in the attempt to accurately price higher degrees of claim complexity is not enough to meet these new demands. Advanced technologies that can process these highly complex claims while efficiently and reliably managing their significant volume are essential in today's healthcare landscape.

TriZetto NetworkX Pricer: Patented technology and continued innovation

The NetworkX Pricer application helps payers establish a foundation that allows rapid response to these and future market changes—driving competitive differentiation and increased value. NetworkX Pricer is part of the Cognizant® line of TriZetto® Healthcare Products—a portfolio of software products that helps healthcare organizations enhance revenue growth, drive administrative efficiency, improve cost and quality of care, and improve the member and patient experience.

This patented pricing application enables payers to:

- Automate pricing for multiple reimbursement methods utilizing more than 350 pricing calculations, including DRGs, APGs, APCs, APR-DRG risk-adjusters and more

Key features of the TriZetto NetworkX Pricer Application

- Growing library of more than 350 pricing calculations
 - Extensive ability to define criteria using more than 150 qualifiers
 - Integration with Medicare, Medicaid third-party grouper and pricer technology
 - Sharable components reduce build and maintenance
 - Single page view of all pricing terms for a given contract
-
- Integrate with Medicare and Medicaid third-party grouper technology
 - Establish and share pricing methodologies for multiple providers at one time
 - Manage multiple fee schedules for a single provider
 - Compare fee schedules leveraging “lesser of” logic
 - Administer multiple-tiered outliers
 - Create unique pricing hierarchies to manage complex commercial agreements

Claims Adjudication Process

NetworX Pricer can be used as a stand-alone solution or integrated with both TriZetto® Facets® and TriZetto® QNXT™ core administration systems to further increase administrative efficiencies. Additionally, a single instance of NetworX Pricer can be used in conjunction with multiple core claim systems.

NetworX Pricer plays a key role in the claims adjudication process, with patented technology that increases automation and efficiency. Integration with multiple legacy systems provides a “single source of fact,” enabling users to price claims across all lines of business consistently and accurately.

TriZetto NetworX Pricer. Increase efficiency. Decrease costs

This advanced pricing application gives payers a single pricing platform that allows:

- Fast, accurate pricing of claims, regardless of the complexity of applicable terms
- One-time set up of a claims-system interface, from a single source or multiple sources
- Easy configuration of claim pricing, reimbursement criteria and rules

- Ability to create many fee schedules using a single base schedule, eliminating redundant maintenance
- Sharing common rate structures for multiple contracts, providing pricing consistency and streamlining updates
- Printing of the NetworX Pricer rate sheet for inclusion with the contract
