Introduction and scope

Everest Group recently released its report titled “Healthcare Business Process Automation Solutions PEAK Matrix™ Assessment 2019.” This report analyzes the changing dynamics of the healthcare business process automation solutions landscape and assesses service providers across several key dimensions.

As a part of this report, Everest Group updated its classification of 14 service providers on the Everest Group PEAK Matrix™ for healthcare business process automation solutions into Leaders, Major Contenders, and Aspirants. The PEAK Matrix is a framework that provides an objective, data-driven, and comparative assessment of healthcare business process automation solutions service providers based on their absolute market success and delivery capability.

Based on the analysis, Cognizant emerged as a Leader. This document focuses on Cognizant’s healthcare business process automation solutions experience and capabilities and includes:

- Cognizant’s position on the Everest Group Healthcare Business Process Automation Solutions PEAK Matrix
- Detailed healthcare business process automation solutions profile of Cognizant

Buyers can use the PEAK Matrix to identify and evaluate different service providers. It helps them understand the service providers’ relative strengths and gaps. However, it is also important to note that while the PEAK Matrix is a useful starting point, the results from the assessment may not be directly prescriptive for each buyer. Buyers will have to consider their unique situation and requirements, and match them against service provider capability for an ideal fit.

### Strengths
- Cognizant has witnessed notable success in the healthcare automation space, which is also evident from a significantly-sized client portfolio and number of deployments
- Trizetto’s acquisition helped Cognizant augment its healthcare business process automation capabilities, especially with the addition of the HPA toolset
- Its breadth of deployments span across the healthcare value chain segments, covering key areas such as claims, care, member, network, risk & compliance, and RCM
- Its ability to successfully sell automation-as-a-service has helped it in achieving significant scale in the healthcare automation space
- While most of the deployments are with the HPA suite, Cognizant has, in the last two to three years, partnered with some of the leading third-party technology vendors (such as Automation Anywhere and UiPath) to further augment its healthcare automation solutions portfolio
- Additionally, investment in areas such as Centers of Excellence (CoE), command centers, and experience centers helps in ensuring expedited and relevant product development, the smooth running of deployed bots, and client education

### Areas of improvement
- While Cognizant has some deployments for large-sized clients, its automation deployments are largely skewed toward the small- and mid-sized clients
- With the acquisition of Bolder Health, it should focus on increasing its deployments in the healthcare provider space, where there is significant potential of automation
- While Cognizant has gained significant traction with RPA deployments, going forward, it could do more to develop, market, and deploy some intelligent automation solutions that leverage AI capabilities
- Its healthcare automation solution team size is on the lower side, especially when compared with its peers. Increasing team size and realigning the solutions might not only help Cognizant develop more provider-focused automation solutions but also reduce the time taken to develop intelligent automation capabilities
- While they have successfully explored the transaction-based pricing model in the healthcare automation space, there is significant room for improvement in terms of employing a more outcome-based pricing model

Overview

Company overview
Cognizant is an American multinational corporation that provides digital, technology, consulting, and operations services. Headquartered in New Jersey, the company operates its business through four segments – financial services, healthcare, manufacturing, and retail & logistics. Cognizant supports multiple client segments, both small to large-sized healthcare payers which include commercial, individual, HIX, Medicare, Medicaid, dental, vision, behavioral, and ACOs. In addition to providing BPS and BPaaS services, Cognizant is also a partner of choice to leading pharmacy benefit managers, healthcare providers, payers, and major Blue plans across the United States.

Key healthcare BPSDA leaders:
- **Francisco D’Souza**, Chief Executive Officer
- **Karen McLoughlin**, Chief Financial Officer
- **Sumithra Gomatam**, President, Digital Operations
- **Krishnan Iyer**, Senior Vice President, Healthcare BPS & Delivery Lead
- **Harshad Narvenkar**, Vice President, Healthcare BPS & Market Lead

Headquarter: Teaneck, New Jersey, the United States
Website: [http://www.cognizant.com/](http://www.cognizant.com/)

Adoption and capability overview

| Number of active healthcare clients with BPSDA deployments: 84 |
| Number of active healthcare BPO clients with BPSDA deployments: 80 |
| Number of healthcare BPSDA FTEs: 212 |
| Number of healthcare BPSDA bots deployed: 2,088 |

Key third-party technology partners: Automation Anywhere, Auto IT, BluePrism, Kapow, Pega Robotics, UiPath, and WorkFusion

Healthcare BPSDA offering structures

- Stand-alone product licenses
- Product licenses + associated BPSDA services
- Stand-alone BPSDA services
- BPSDA as part of broader BPO deals

Recent acquisitions/partnerships
- **2017**: Acquired Brilliant Services to enhance speed-to-market and IoT cognitive computing capabilities
- **2016**: Acquired Idea Couture, a digital innovation, strategy, and design firm to develop solutions in the patient-centered design thinking space
- **2016**: Acquired Mirabeau BV, a digital marketing and customer experience agency, to expand its digital business capabilities in the Netherlands and across Europe

Key locations with healthcare BPSDA FTEs:
- United States
- India

The AI components improve the quality of clients and simultaneously reduce internal costs.                                                                                                                                                | 65            |
Appendix
Everest Group PEAK Matrix™ is a proprietary framework for assessment of market impact and vision & capability.
Solutions PEAK Matrix™ evaluation dimensions

Measures impact created in the market – captured through three subdimensions

**Market adoption**
Size and growth of deployments across the solution portfolio

**Portfolio mix**
Solution footprint across geographies, industries, and buyer size segments

**Value delivered**
Value delivered to the client based on customer feedback and other measures

Measures ability to deliver solutions successfully. This is captured through five subdimensions

**Vision and strategy**
Vision for the client and itself; future roadmap and strategy

**Technology capability**
Technical sophistication and breadth/depth across the technology suite

**Services capability**
Effectiveness and breadth/depth of services portfolios across the services suite

**Innovation and investments**
Innovation and investment in the solution suite

**Engagement and commercial model**
Progressiveness, effectiveness, and flexibility of engagement and commercial models
FAQs

Does the PEAK Matrix™ assessment incorporate any subjective criteria?
Everest Group’s PEAK Matrix assessment adopts an unbiased and fact-based approach (leveraging service provider / technology vendor RFIs and Everest Group’s proprietary databases containing providers’ deals and operational capability information). In addition, these results are validated / fine-tuned based on our market experience, buyer interaction, and provider/vendor briefings.

Is being a “Major Contender” or “Aspirant” on the PEAK Matrix, an unfavorable outcome?
No. The PEAK Matrix highlights and positions only the best-in-class service providers / technology vendors in a particular space. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is itself a favorable recognition.

What other aspects of PEAK Matrix assessment are relevant to buyers and providers besides the “PEAK Matrix position”?
A PEAK Matrix position is only one aspect of Everest Group’s overall assessment. In addition to assigning a “Leader”, “Major Contender,” or “Aspirant” title, Everest Group highlights the distinctive capabilities and unique attributes of all the PEAK Matrix providers assessed in its report. The detailed metric-level assessment and associated commentary is helpful for buyers in selecting particular providers/vendors for their specific requirements. It also helps providers/vendors showcase their strengths in specific areas.

What are the incentives for buyers and providers to participate/provide input to PEAK Matrix research?
- Participation incentives for buyers include a summary of key findings from the PEAK Matrix assessment
- Participation incentives for providers/vendors include adequate representation and recognition of their capabilities/success in the market place, and a copy of their own “profile” that is published by Everest Group as part of the “compendium of PEAK Matrix providers” profiles

What is the process for a service provider / technology vendor to leverage their PEAK Matrix positioning and/or “Star Performer” status?
- Providers/vendors can use their PEAK Matrix positioning or “Star Performer” rating in multiple ways including:
  - Issue a press release declaring their positioning. See citation policies
  - Customized PEAK Matrix profile for circulation (with clients, prospects, etc.)
  - Quotes from Everest Group analysts could be disseminated to the media
  - Leverage PEAK Matrix branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.)
- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with the designated POC at Everest Group.

Does the PEAK Matrix evaluation criteria change over a period of time?
PEAK Matrix assessments are designed to serve present and future needs of the enterprises. Given the dynamic nature of the global services market and rampant disruption, the assessment criteria are realigned as and when needed to reflect the current market reality as well as serve the future expectations of enterprises.
About Everest Group

Everest Group is a consulting and research firm focused on strategic IT, business services, and sourcing. We are trusted advisors to senior executives of leading enterprises, providers, and investors. Our firm helps clients improve operational and financial performance through a hands-on process that supports them in making well-informed decisions that deliver high-impact results and achieve sustained value. Our insight and guidance empower clients to improve organizational efficiency, effectiveness, agility, and responsiveness. What sets Everest Group apart is the integration of deep sourcing knowledge, problem-solving skills and original research. Details and in-depth content are available at www.everestgrp.com.
