

TriZetto® Claim Test Pro™

Testing Claims Data Just Got Easier

With increased focus on administrative efficiency and medical loss ratios (MLR), being able to validate, test and manage claims data can be critical to helping ensure that your plan is making correct and timely payments to contracted providers.

The right testing strategy will allow you to:

- Reduce overpayments to providers
- Reduce administrative costs
- Reduce test cycle time
- Reduce critical defects introduced to production

Claims testing has never been so organized

There is a lot of complexity involved in managing system upgrades, new releases, service pack upgrades and data migrations—complexity that can put claims payment processes at risk. The TriZetto Claim Test Pro application enables efficient and cost-effective claims data testing that can allow your health plan to verify with confidence that correct claim totals are being paid.

TriZetto Claim Test Pro supports most major claims payment systems including:

- FACETS™
- QNXT™ / QMACS®
- DIAMOND®
- MHC / PowerMHS / PowerSTEPP
- AMISYS
- MC 400 - OAO
- Metavance
- COSMOS

Claim Test Pro is part of the Cognizant line of TriZetto Healthcare Products—a portfolio of software products that help healthcare organizations enhance revenue growth, drive administrative efficiency, improve cost and quality of care and improve the member and patient experience.

The Claim Test Pro application improves process efficiency by greatly reducing the manual creation of test cases, automating the management and reconciliation of results, tracking and documenting test projects and cases, and electronically converting system data to applicable testing data sets to create a robust and appropriate testing environment.

A comprehensive set of testing suites provides a diverse volume of schemas for testing a multitude of provider reimbursement scenarios. Because Claim Test Pro automates many previously manual processes, it can help reduce the resources needed to manage these initiatives. As an added benefit, management tools track and report progress.

With Claim Test Pro, you can:

- Test large volumes of claims with 100% reconciliation
- Create ANSI-compliant 837 files
- Create user specific testing suites (scenarios) that meet requirements
- Utilize conversion features for Members and Providers
- Perform statistical sampling of claims for auditing
- Modify test cases to meet necessary requirements
- Take advantage of 800+ Test Case Templates
- Print claims data on CMS1500 and UB04 forms for manual entry/OCR
- Automate reconciliation of expected results to actual results
- Import and apply new fee schedules to validate contract configuration

Higher testing productivity

Claim Test Pro takes advantage of industry standards to increase opportunities for testing automation by utilizing optimized test plans created with an applied statistics-based approach. Claim Test Pro has been shown, on average, to more than double tester productivity both in creating test cases and in executing test plans. Further, the application is virtually self-documenting when it comes to summarizing what has been tested and reconciled—providing yet another efficiency-enhancing feature.

Achieve more than 50% Reduction in Total Cost of Testing Ownership, and Test Large Volumes of Claims with High Percentage Reconciliation

- Quickly build broad or complex testing scenarios
- Effortlessly customize existing data to fit testing needs
- Modify single or multiple test scenarios to meet specific requirements

Claim Test Pro supports most major claims payment systems and is currently in use by 63 health plans.

Reach your objectives faster

In addition to TriZetto Claim Test Pro, we offer an extensive line of solutions and services that harness the power of digital to optimize your business. Achieve new levels of performance and efficiency with Digital Business, Digital Operations, and Digital Systems and Technology capabilities from Cognizant.
