## TriZetto® NetworX Payment Bundling Administration Analytics™

Evaluate and manage episodes of care

The move to value-based reimbursement models among payers is rapidly gaining acceptance. CMS is targeting 50% of its payments through alternative payment models by 2018. Payers require additional support to manage these value-based care contracts and analytics is a key enabling capability.

By having access to data and vastly improved analytic capabilities, payers can interpret, evaluate, design and manage their bundled payment program. These capabilities help to achieve the programs' goals to reduce medical cost, increase quality of care and enhance patient outcomes. Value-based reimbursement programs aid payers in increasing market presence plus a competitive advantage in a rapidly changing industry.

NetworX Payment Bundling Administration Analytics solution allows users to:

- **DESIGN** – varying bundled payment arrangements by identifying potential types of episode based contracts and prospective providers to manage the episode
- **RUN** – any form of bundle arrangements including prospective and retrospective bundled payment engagements
- **MANAGE** – by integrating financial, operational and quality data to deliver value

### Advanced Reporting and Analytics

The NetworX Payment Bundling Administration Analytics™ solution provides advanced reporting and analytics based on bundled claims data generated by the NetworX Payment Bundling Administration™ engine. The solution allows Payment Innovation Directors and other end users to evaluate episode opportunities, provider performance and manage contracted episodes of care. This solution provides flexibility in data collection and allows configuration with unique criteria.

**PBA Analytics Specifics:**

- Leverages Tableau Business Intelligence (BI) tool for visualization of data and report views
- Report views for discovery phase of program development to identify potential episodes of care, attributing providers and current FFS cost.
- Report views for execution phase of program to manage ongoing and completed episodes of care and track overall successfulness of the program.
- Drill down and drill through report navigation

The NetworX Payment Bundling Administration Analytics™ is part of the Cognizant line of TriZetto Healthcare Products—a portfolio of software products that help healthcare organizations enhance revenue growth, drive administrative efficiency, improve cost and quality of care and improve the member and patient experience.

With market forces and healthcare reform legislation demanding that payers and providers collaborate more closely, bundling payments is an important and preferable step towards shared risk arrangements and healthcare cost reduction. NetworX Payment Bundling Administration Analytics™ is a key capability within TriZetto’s portfolio of solutions helping payers and providers enter payment bundle arrangements to reduce costs, improve quality and achieve better outcomes.

**Reach Your Objectives Faster**

In addition to TriZetto NetworX Payment Bundling Administration Analytics™, we offer an extensive line of solutions and services that harness the power of digital to optimize your business.
