TriZetto® QNXT™-Based Solutions for Medicaid

Support today's expanding medicaid market

With an estimated 58.9 million individuals eligible for Medicaid by 2020, today's Medicaid plans are preparing for rapid growth as they deal with state budgets in crisis. These plans are also being challenged to meet changing regulatory requirements while increasing legislative efficiency.

Success in a dynamic market

TriZetto QNXT-based solutions for Medicaid include a highly effective combination of advanced technology offerings. Using the flexible and scalable QNXT core administration system as the foundation, Medicaid plans can incorporate an array of sophisticated solutions that integrate with QNXT to help improve quality and lower the cost of care.

QNXT-based solutions for Medicaid are part of the Cognizant® line of TriZetto® Healthcare Products—a portfolio of software products that helps healthcare organizations enhance revenue growth, drive administrative efficiency, improve cost and quality of care, and improve the member and patient experience.

“The TriZetto QNXT system is the one platform with the functionality to eliminate most of the workarounds in claims that require manual touches, and it has a strong track record in Medicaid.”

Rhonda Haygood
Chief Financial Officer,
Vantage Health Plan

Meeting your Medicaid requirements

Coordinating the benefits and care of a Medicaid healthcare consumer demands a comprehensive approach. TriZetto QNXT-based solutions for Medicaid allow your Medicaid plan to realize administrative efficiencies as you enhance the quality of care delivered to plan members.

TriZetto® QNXT™ Enterprise offers Medicaid-specific claims processing and enrollment functionality that can significantly enhance the workflow of your operation. Critical functions such as enrollment, premium billing, claims processing and customer service are streamlined and automated. Your plan's medical management needs are supported through integrated care management capabilities while detailed reporting functionality helps you meet regulatory reporting requirements.

TriZetto® Encounter Data Manager interfaces with key data sources to generate and edit required state-specific encounter data submissions for Medicaid. Data sources may include the core claims processing system, a data warehouse, and a pharmacy or dental vendor. The system also interfaces with TriZetto-based applications, including the QNXT platform, and provides extraction, delivery, tracking, reporting, editing and encounter data resolution.

TriZetto CareAdvance Enterprise® is a secure, web-based communication platform that identifies members for inclusion in care management programs and monitors health status while effectively engaging members in their own care. The solution supports utilization, case, disease and population management, and helps payers meet federal and state requirements for quality initiatives and care improvement.

TriZetto NetworX Suite® helps plans conform to state-mandated payment and contracting guidelines. NetworX Pricer® automates the pricing of claims with respect to diverse fee schedules and complex provider contracts. NetworX Modeler® models provider contracts against state Medicaid fee schedules and analyzes the impact of yearly changes. NetworX Modeler Analytics™ integrates with NetworX Modeler to provide customized, actionable reports and sophisticated business intelligence.

Reach your objectives faster

In addition to TriZetto QNXT-based solutions for Medicaid, we offer an extensive line of solutions and services that harnesses the power of digital to optimize your business. Achieve new levels of performance and efficiency with digital business, digital operations, and digital systems and technology capabilities from Cognizant.
