

Cognizant Security

Find and manage vulnerabilities throughout your entire technology footprint, from your network to your infrastructure and across your portfolio of applications.

Vulnerability Management-as-a-Service (VMaaS) from Cognizant Security

Identifying and prioritizing remediation activities for the thousands of new security vulnerabilities that are disclosed each year, in addition to the tens of thousands that already potentially threaten your environment, can leave your security team overwhelmed and constantly fighting to catch up. Add to that the ever-growing compliance requirements that your organization must meet as well as the struggle to find and retain skilled security resources, and it becomes clear that the current approach isn't sustainable. Cognizant Security is here to help. With our Vulnerability Management-as-a-Service solution, customers enjoy benefits such as:

- Simplified and consolidated vulnerability management program that is aligned with your corporate objectives and strategy
- Single point of control to coordinate key vulnerability management activities and information sharing across your different business units and functions
- Fast and effective deployment model from our cloud-based platform that reduces the time and effort associated with installing and maintaining your hardware solutions
- On-demand reporting to meet your ongoing compliance audit requirements
- 24x7x365 management by Cognizant Security experts, freeing up your security team to work on other projects

Cognizant Security's Vulnerability Management-as-a-Service solution is part of a broad portfolio of consulting, professional and managed security services designed to help our clients meet their security challenges.
