

**Industry leaders don't just partner.
They build what comes next.**

See how we're empowering payers to thrive,
no matter what the future brings.

The future of healthcare isn't waiting. Neither are we.

Healthcare is evolving faster than ever. AI raised the bar for how fast decisions get made. Security threats are multiplying in real time. And the pressure to do more with less is relentless.

Legacy technology wasn't built for any of this. It can't support AI or agentic operations. And the longer payers wait to modernize, the harder it is to catch up.

That's why Cognizant and Amazon Web Services (AWS) came together. Not as a typical partnership, but as a purpose-built collaboration between two healthcare technology leaders.

Accelerating transformation like never before

Cognizant TriZetto® is the number one core administration system for healthcare payers. AWS is the top-ranked cloud infrastructure provider.* Together, we deliver a cloud-based foundation that enables payers to:

- **Modernize faster** with lower-risk migration of existing lines of business
- **Unlock AI at scale** to automate processes and accelerate decision-making
- **Expand into new markets** with less upfront investment and faster time to market
- **Reduce costs** while improving operational efficiency

* Cognizant ranked as a top performer in the Claims & Administration Platforms (Payer) segment in 2026 Best in KLAS report for core platforms. AWS ranked as a top performer in Best in KLAS Public Cloud in 2026.

Built for speed, security and scale

Our partnership gives payers secure, scalable access to cloud technologies that deliver immediate and ongoing value:

- **A nimble cloud environment** that adapts to regulatory and market changes
- **Advanced security** with built-in ransomware detection, AI-driven threat response and faster time to detection
- **Access to the largest cloud ecosystem** in healthcare
- **Unmatched time to value** across migration, managed services and AI adoption

A roadmap for what's next

TriZetto solutions are already optimized for AWS, and our partnership will deliver even more advances with a five-year, 17-product innovation roadmap. Key benefits include:

- Containerized deployments with Amazon EKS
- Serverless HL7 Fast Healthcare Interoperability Resources (HL7® FHIR®) and OpenAPI layers
- Quarterly releases of cloud-native features
- AI-assisted workflows
- Faster app deployment with lower overhead
- Seamless scalability for changing workloads
- Stronger security with AWS integration and automated updates

The most powerful cloud ecosystem

Payers get access to the largest cloud ecosystem in healthcare—including over 330 independent software vendor (ISV) solutions through AWS Marketplace—and can optimize with:

- Bedrock generative AI services
- Lake House analytics architecture (HealthLake + Redshift)
- Zero trust security on HITRUST® r2-certified infrastructure
- Tools onboarded in minutes, not months
- Seamless integration with partners including Lyric/Optum CES and Zelis
- Full access to AWS compliance and security protections
- Turnkey AI-ready transformation without added IT infrastructure or operations overhead

The future of managed services

Imagine upgrading your tech without expanding your team. Our end-to-end managed services empower payers to:

- Step into a preconfigured, HIPAA-ready environment with a built-in head start
- Reduce compliance, change management and upgrade costs by up to 50%
- Automate up to 80% of manual HIPAA compliance work, freeing up thousands of hours annually
- Use AI and agentic automation to reduce manual claims processing and improve speed and accuracy

Cloud migration in half the time

Cognizant and AWS can cut your migration timeline by up to 50% using proven playbooks, automated migration scripts and healthcare-compliant landing zones—so you can modernize confidently and quickly.
