Automatically available features

Stability enhancements for asset accounting

What's changing

With the 2024R2 release, Workday improves the asset accounting engine, enabling you to experience better stability when creating and maintaining assets. This improves the health of your tenant when creating assets.

Additional considerations

Workday updates how we assign accounting to assets, improving stability when allocating system resources.

What do i need to do?

N/A

What happens if i do nothing?

Validation on asset transfers

What's changing

With the 2024R2 release, for assets that you've transferred in from another company, Workday now prevents you from recording intracompany asset transfers that predate the transfer-in date.

Additional considerations

Workday adds a new validation on these tasks to ensure that the transaction effective date is on or after the intercompany transfer-in date for the asset:

- Transfer Asset
- Transfer Assets

They have also updated these web services with the new validation:

- Bulk Import Transfer Asset
- Transfer Asset

What do i need to do?

To use the web service, update the web service to v43.0.
