

# Workday 2024 R2 Release Impact Analysis

Supplier contracts

2024

# Supplier contracts

# Automatically available features

# Unsupported security group access to supplier contract reporting data sources

## What's changing

With the 2024R2 release, Workday enables greater access to the Supplier Contract Lines report data source for security groups.

## Additional considerations

Workday updates the Supplier Contract Lines data source filter to evaluate security for these security groups:

- Intersection
- Supplier Contract Specialist for Supplier Contract
- Unconstrained

For Intersection security group users, Workday now only displays contract lines that meet all dimensions of the security group on custom reports.

Supplier Contract Specialist for Supplier Contract security group users can now view contract lines on custom reports, but not amendment or history lines.

## What do i need to do?

N/A

## What happens if i do nothing?

N/A

# Unsupported security group access to supplier contract reporting data sources

## Additional considerations

Unconstrained security group users can now view entire custom reports.

Workday also updates the **Organizations** prompt on custom reports to display only relevant values to the respective security groups.

Workday delivers a new Supplier Contract State Line Type report field on the Supplier Contract Line (secured to the Public Reporting Items domain) that you can use in custom reports on the status of supplier contract lines.
