United Kingdom Challenge

Transform the England Football Learning hub into a welcoming, inclusive destination for coaches at all levels of the

game, from grassroots to elite.

Success Highlights

• 180 days of effort saved annually through automation

• 74% increase in average monthly page views

• 640,000 new enrollments for football education

The England Football Association (The FA) is the governing body for football in England, overseeing everything from the grassroots game to the English Premier League and the national teams. A key aim is to ensure that participants such as players,

The challenge

coaches and referees are fully trained in the game's rules and values, and that training is available to everyone who wants to become a coach or advance their coaching career. Previously, The FA conducted 100% of its training in person, but that approach was increasingly out of step with modern expectations of digital content and self-directed online learning. An online education platform had brought some training modules online, but it could be hard to navigate, education pathways were linear and prescriptive, and it was not fully

accessible and inclusive. Leveling up football education to ensure "Football for All" The FA planned a comprehensive leveling-up of its online

strategy. This initiative aimed to attract a diverse audience, including those from underrepresented groups, to participate in the game. By making its learning content accessible to more

learning hub as part of its wider digital transformation

people, The FA hoped to bring the game to a wider range of communities and realize its vision of "Football for All." As The FA's digital transformation partner, Cognizant was privileged to lead this project.

software assets and a digital platform that were already in use in its organization.

life with intuitive Microsoft PowerBI reports.

Tailored to learning preferences

Our approach

Key principles we used to design and deliver the project included: Inclusive and learner-centered The new hub had to be welcoming and intuitive for all users, no matter their gender, background or ability. We involved users

Our aim was to deliver an education hub which made learners feel welcome, valued and engaged—where the learning experience is meaningful, enjoyable and collaborative, and where learners are in control of their own learning path and progression. At the same time, we aimed to realize technology innovations driving extensive reusability for The FA by leveraging

improvements continue to be delivered iteratively, based partly on user behavior insights gained from site analytics, brought to

at all stages of the project, iterating on the functionality and look and feel based on their feedback. Enhancements and

Different people learn in different ways, so we designed the hub to allow users to construct their own personalized, nonlinear learning journeys. This meant making content easy to find for those building their own learning path, and providing content in different formats, from deep-dive videos to quizzes and bite-size pieces.

supporting materials, talk to the FA community and get expert guidance on their learning journey.

Collaborative and supportive

Personalized and intelligent

Visually impactful We designed a new look and feel to reflect the inclusive, accessible and empowering values of the hub. Distinctive branding elements make it a destination in its own right while remaining true to the England Football brand, values and ethos.

We sought to leverage existing technology platforms and software components wherever possible, allowing The FA to benefit from extensive reuse. The hub leverages the same Sitecore content management system (CMS) as the England Football website, allowing The FA to deliver a rich array of easily found content to both sites.

Cost-effective

"The FA is committed to driving positive change both within the game

and in wider society. The Learning Hub is an example of how we are living that commitment—providing an accessible and inclusive digital

potential. We needed the Learning Hub to offer a world-class digital experience, and that is what Cognizant has delivered—and continues

space to support everyone in English football to achieve their full

to deliver—as our long-term digital transformation partner."

Lucy Pearson, Head of Education, The FA **Business outcomes** The FA had high expectations for the England Football Learning hub, setting key performance indicators (KPIs) on a wide range of metrics including new site visits, interactions, page views, dwell time (on the hub and within each content asset), returning visitors, enrollments and revenue generation. One month post launch, the hub had already begun to exceed expectations for learner engagement, with newly automated processes also delivering significant annual time savings. Specific outcomes included:

• 68.35% of video starts complete the video • 280 person hours saved annually through a new email automation process • 180 days of manual effort saved annually through automation to remove duplicated effort

designed to support you in your role

levels of football

• 36% increase in user dwell time on the hub

• 5.5 million increase in interactions on the hub (141% of target)

• 640,000 learners registered for educational content

• 132% increase in new site visits • 188% increase in returning visitors

ONGOING LEARNING Ongoing learning

• 74% increase in average monthly page views (2,022% of target) after one month

elevate it from a website into a supportive home for coaches at all levels of the game. From beginners to seasoned professionals, the England Football Learning supports personal of manual effort saved annually development while furthering The FA's mission to enable
