snowflake® | Cognizant

PARTNER BRIEF

COGNIZANT DELIVERS SNOWFLAKE CLOUD MODERNIZATION

Proven and assured success in modernizing your cloud data strategy on Snowflake

Cognizant offers a Teradata to Snowflake Migration Solution that simplifies and speeds up the process for organizations that want to move from their old Teradata systems to the Snowflake platform. Moving to the cloud provides several benefits, such as cost savings from a scalable and repeatable migration method, faster time-to-market, and a rationalized application portfolio through identifying suitable applications for cloud migration.

Additionally, cloud adoption enables digital transformation by enhancing agility, modernizing aging infrastructure, and facilitating cultural change. Cloud flexibility ensures that organizations can easily handle peak demands without overprovisioning resources. Cognizant has successfully assisted numerous global leaders across different industries in migrating their data from on-premise Teradata to Snowflake, leading to productivity improvements, reduced total cost of ownership (TCO), and streamlined governance and standards.

Cognizant's Factory Model Approach

Cognizant's solution for migrating from Teradata to Snowflake adopts a factory model approach that enables a complete data migration, effective management of change data capture streams, and fast exportation of Teradata data to flat files. This adaptable solution can be customized to meet the specific needs of each client, providing a smooth and effortless migration experience.
Cognizant's factory model approach incorporates clearly defined tasks, input and output criteria, and proven data modernization tools and accelerators. This approach helps organizations accelerate their data migration to Snowflake and modernize their data infrastructure.

CUSTOMIZABLE OPTIONS
Tailored solutions designed to meet each client's unique requirements and objectives

SCALABLE SOLUTIONS
Individualized solutions ready to scale to your organization's peak demands and growth

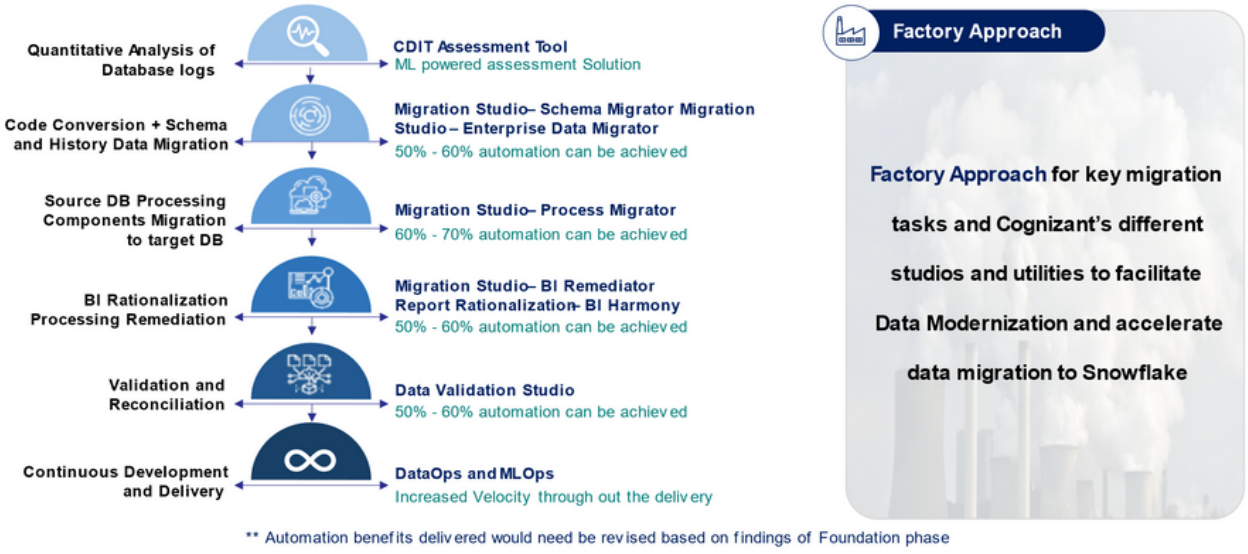

ENHANCED AGILITY
Leveraging proven tools and accelerators to speed up data migration and modernization

LIFT AND SHIFT APPROACH
Seamlessly migrate existing Teradata processes to Snowflake while minimizing disruptions and maintaining business continuity

We follow a 'Factory Model' approach for migration to Snowflake….

Cognizant's 'Factory Model' approach for migration with well-defined tasks, qualified inpet and output, supported by proven Data Modernization tools and accelerators

Cognizant's Comprehensive and Scalable Teradata to Snowflake Migration Solution for Seamless Data Transition

Cognizant's migration approach ensures a smooth transition from Teradata to Snowflake using a clearly defined process that covers planning, schema and code conversion, data migration, and validation. The approach includes process migration, scheduling adjustments, and repointing of reporting applications to ensure accuracy and maintain business continuity. This comprehensive solution utilizes a lift and shift strategy to minimize disruptions during the migration process. It also provides a scalable and customizable framework that can be tailored to meet the unique requirements of each organization.

ABOUT SNOWFLAKE

Snowflake enables every organization to mobilize their data with Snowflake's Data Cloud. Customers use the Data Cloud to unite siloed data, discover and securely share data, and execute diverse analytic workloads. Wherever data or users live, Snowflake delivers a single data experience that spans multiple clouds and geographies. Thousands of customers across many industries, including 543 of the 2022 Forbes Global 2000 (G2K) as of October 31, 2022, use Snowflake Data Cloud to power their businesses.
