

# Everest Group AI-deas to Action: Operationalizing Generative AI in Healthcare Payer

Focus on Cognizant

April 2025

# Introduction

Generative AI has rapidly emerged as a transformative force, reshaping the healthcare payer industry and establishing itself as a critical driver for innovation. With the ability to optimize key functions such as claims processing, member engagement, and care management, Generative AI has shown the potential to enhance operational efficiency, streamline workflows, and significantly improve outcomes for both payers and members.

However, adopting generative AI comes with its own challenges, such as concerns about data privacy, model accuracy, training resource demands, and ethical implications. To address these issues, providers are leveraging advanced technologies such as encryption, anonymization, and federated learning for secure data handling. Continuous validation processes and feedback

loops are improving AI reliability, while modular architectures and scalable cloud infrastructures provide the flexibility required for smooth integration and deployment.

As generative AI evolves into a valuable driver for industry innovation, providers are slowly moving beyond experimental pilot projects to full-scale implementations.

## In the report, we focus on:

- The value promise of generative AI across different segments of the healthcare payer value chain
- Generative AI market adoption in healthcare payer
- Provider profiles

## Scope of this report

**Geography:** North America

**Industry:** healthcare payer

**Services:** generative AI

**Provider profiles:** 13 leading healthcare payer providers

# Scope of the research

## Generative AI

The term "generative AI" (Gen AI) describes a branch of artificial intelligence that concentrates on producing new knowledge, data, or content by using patterns discovered in previously collected data. It creates text, photos, music, and other material using cutting-edge machine learning models, especially deep learning approaches.

# For this report, Everest Group restricted itself to a carefully chosen provider ecosystem

## Broad category of providers

Healthcare  
specialists

Broad-based  
IT/BPOs

## Filtration criteria

- Providers selected for this report have been profiled in **Everest Group's Healthcare Payer Operations PEAK Matrix® Assessment 2023**
- Providers included in this report must either have healthcare payer revenues exceeding **US\$100 million** in 2023 or achieve a Harvey score of above 5 in Innovation and Investment in the PEAK Matrix analysis
- Providers profiled in this report have extensive coverage across the healthcare payer value chain, with each provider maintaining dedicated FTEs in at least five of the primary value chain segments

## Generative AI capabilities of the provider ecosystem are assessed on specific parameters

Based on the evaluation parameters, the providers are classified as Challengers, Fast-followers, and Front-runners

### Challengers

Providers striving to close the gap with the Fast-followers

### Fast-followers

Providers that exceed market maturity (38th percentile) but trail just behind the Front-runners

### Front-runners

Providers ahead of the Fast-followers and rank in the top 35th percentile of the profiled firms

# Everest Group's generative AI healthcare payer market adoption assessment

Consolidated generative AI adoption maturity of select providers

## Challengers

Providers striving to close the gap with the Fast-followers

## Gen AI adoption maturity and top use cases

### Key healthcare payer operations use cases in generative AI

Use case	Description	Value chain functions	Stage	Technology used (model, algorithms, etc.)	In-house/M&A/ Partnership/Other
Product Owner Assist	Automates user story creation, allowing product owners to create, modify, or update stories. Powered by a Knowledge Graph, it enables the crafting of detailed user stories	Product development	Production	Azure Open AI	Other
Developer Assist	This solution serves as a virtual assistant for developers, offering technical Q&A through a chatbot that navigates the enterprise knowledge base and provides coding assistance, including issue resolution, revisions, and code refinement to meet internal standards	Product development	Production	Azure Open AI	Other
Accelerated testing using gen AI	This gen AI solution facilitates the automation of unit test codes and generation of test cases and test data which helps in streamlining the testing process	Product development	Production	Azure Open AI	Other
Plan shopper	Accelerates plan selection by aligning member preferences (location, copay, etc.) and clinical profile (conditions, medications) using data from various payer sources (benefit documents, formularies, and provider directories)	Member engagement	Pilot	Google LLM	Partnership
Prediction of Mental Health Conditions	Automates and summarizes the mental health state of the patient, which helps both the patient and provider with early detection of mental health status and diagnoses using conversational language and LLM insights	Care management	Pilot	Azure Open AI	In-house
AI for HEDIS Data Analysis and Measure Calculation	Extracts key information from unstructured data, improving the efficiency and accuracy of measure calculations	Risk and compliance	Pilot	Google LLM	Partnership

Note: Linear representation of market adoption is not as per scale.

## Overview and capabilities

### Company overview

Cognizant is a professional services firm that transforms its clients' business, operating, and technology models for the digital age. Its industry-specific, consultative approach assists clients in envisioning, building, and operating more innovative and efficient firms. It provides platform and product suites, infrastructure services, IT services, and cloud and digital solutions.

**Headquarters:** Teaneck, New Jersey

**Website:** [www.cognizant.com](http://www.cognizant.com)

### Healthcare payer generative AI vision and strategy

Cognizant is driving AI-powered transformation across sectors through focus on human-AI collaboration and enterprise-wide innovation. It plans to invest \$1 billion in gen AI over the next three years, focusing on platforms, talent, partnerships, IT, and acquisitions. Cognizant with its **Rewire for AI** approach aims to help businesses adapt their operations for an AI-driven future.

Cognizant's gen AI strategy focuses on five key pillars: embedding domain expertise through verticalized solutions, scaling enterprise adoption via platforms and a gen AI Center of Excellence (CoE), driving innovation to meet market trends, ensuring safe deployment with governance frameworks, and expanding partnerships for joint solution development. Key initiatives include partnerships to enhance AI adoption and efficiency, along with AI Innovation Studios to develop practical solutions. Cognizant has launched AI platforms such as Cognizant Neuro® AI and is integrating generative AI into healthcare administration through its TriZetto-Microsoft partnership to improve operational efficiency and patient care.

### Key leaders

- Ravi Kumar, Chief Executive Officer
- Ganesh Ayyar, Executive Vice President, Intuitive Operations and Automation and Industry Solutions
- Naveen Sharma, SVP & Global Head – AI and Analytics Practice
- Sanjay Subramanian - SVP and BU Head Healthcare Payer
- Rajagopal Ramaswamy – Strategy and Growth Leader, Payer Business
- Mykola Hayvanovych - Global Head of Generative AI
- Sarah Smith – Practice Head, Data, AI and Analytics Healthcare
- Melissa Merdan, Vice President Healthcare Business Process Services at Cognizant

### Services offered in generative AI in healthcare payer

- Advisory services
- Technology services - gen AI platforms
- Implementation services

### Key partnerships for generative AI in healthcare payer

## Follow us on

Everest Group is a leading research firm helping business leaders make confident decisions. We guide clients through today's market challenges and strengthen their strategies by applying contextualized problem-solving to their unique situations. This drives maximized operational and financial performance and transformative experiences. Our deep expertise and tenacious research focused on technology, business processes, and engineering through the lenses of talent, sustainability, and sourcing delivers precise and action-oriented guidance. Find further details and in-depth content at [www.everestgrp.com](http://www.everestgrp.com).
