

Blockchain Services 2025 RadarView™

Marketing material

Analyst quote

"As blockchain adoption matures, the banking and government sectors are leading in POC-to-production conversions, driven by clearer regulations, tokenization use cases, and the convergence of AI and blockchain. Enterprises are increasingly leveraging blockchain to enhance transparency, traceability, and efficiency across identity, asset, and data management.

Cognizant's blockchain practice reflects these broader market trends through a technology-agnostic and multicloud approach that supports interoperability across more than 25 blockchain frameworks. Its Blockchain Platform as a Service (BPaaS) and Code Generator for Corda accelerate solution development, emphasizing secure, privacy-driven data exchange. Cognizant continues to expand its blockchain ecosystem through collaborations with R3, Hyperledger Fabric, Polygon, and major cloud providers, including AWS, Azure, and Google Cloud. Its partnerships with academic and industry bodies, including the Linux Foundation and Synaptic Health Alliance, further strengthen its research-led innovation agenda.

Cognizant's consistent investments in blockchain certifications, domain-driven solutions, ecosystem partnerships, and proven POC-to-production success, have solidified its position as a Leader in Avasant's *Blockchain Services 2025 RadarView*™."
