CONTRACT CODING FOR PROVIDERS

CODING ACCURACY

Does your organization have a high denial rate due to clinical coding errors or high DNFB numbers? Is your coding team up-to-date and trained on new coding regulations and guidelines? Coding can be difficult, time-consuming and expensive for providers. Ensuring accuracy for coding changes and adhering to compliance rules is vital to increasing revenue and timely claims resolution for hospitals and clinical practices. Finding the right specialty coders may also be key to increasing your organization's revenue.

Reduce errors with Bolder

Bolder Healthcare's coding solution assists with the cumbersome, time-consuming and often inaccurate task of clinical coding. Our subject matter experts and deep expertise in this space improve accuracy and efficiency and ensure faster turnaround time and successful claim resolutions, which can lower operating costs and increase revenues for practices, facilities or hospitals.

Coding expertise

We have experienced, credentialed (RHIA, RHIT, CCS, CPC, CCDS and AHIMA ICD-10) coders available to assist client facilities with contract coding. Bolder can help when you have a long-term need, backlog or staff leave of absence. We have experience with remote access logins for a wide variety of Virtual Private Networks (VPN) and web-based applications, plus the right mix of expertise to ensure the most effective coding services.
