TriZetto Payer Clinical Data Exchange Solution

Reduce administrative costs, expedite outcomes and increase member satisfaction with efficient data sharing

Clinical data exchange in the healthcare industry all too often relies on faxing, phone calls and manual data entry. Using such obsolete methods to exchange essential clinical data is expensive, slow, a security risk and labor intensive. The inability to share critical data efficiently limits effective care coordination, resulting in safety issues, increased medical costs and reduced member satisfaction. These poor outcomes can easily damage a payer's reputation, driving members and providers to competitors who offer more advanced and efficient data exchange solutions.

Gain the benefits of interoperability today with the TriZetto Payer Clinical Data Exchange Solution

The TriZetto® Payer Clinical Data Exchange Solution accelerates interoperability by bridging the gap between your organization and providers through advanced API connectivity. Built on the Fast Healthcare Interoperability Resources (FHIR®) standard, our solution enables secure, timely data exchange between your organization and providers, enhancing care coordination, reducing administrative burdens and improving decision making.

With this solution you can:

- Streamline critical operations, including prior authorization and claims adjudication
- Request, exchange and submit patient records, lab results, medication histories and other important health information
- Share data and documentation efficiently to enhance care coordination
- Make better-informed clinical decisions that could improve patient outcomes

Improve care and optimize costs with interoperable clinical data exchange

The TriZetto Clinical Data Exchange Solution will enable your organization to improve a wide range of processes with benefits and capabilities like these:

- Reduced operating costs. Simplifying data exchange and reducing or even eliminating reliance on outdated manual systems enables better use of staffing resources.
- Improved care coordination. Digitized data sharing reduces administrative tasks, streamlines workflows and provides data for higher quality personalized interactions with members.
- Better outcomes. Enhancing care coordination through efficient interoperable data exchange enables more informed clinical decision making to improve care delivery and health outcomes.
- Enhanced member experiences. Faster preauthorization workflows and swifter resolution of claims and billing questions improve member satisfaction.
- Future-ready positioning. Aligning your organization with current industry interoperability standards and FHIR® requirements helps you meet future data exchange and interoperability standards.

Now and future flexibility with system-agnostic solution

The TriZetto Clinical Data Exchange Solution works across all major EMR/EHR systems and payer care and quality management solutions that use the FHIR format. The solution comes pre-integrated with TriZetto Facets®, QNXT™ and CareAdvance®. We engineered the solution to easily expand your interoperability capabilities as the industry's use of FHIR grows. The key future-proofing features in our solution include:

Flexibility

Integrates easily with systems using API integration.

Enhanced data security

Leverages FHIR-based, task-driven workflows to ensure trusted, standards-aligned clinical data exchange.

Standardized data exchange with FHIR format

Ensures interoperability and data consistency.

Open and standards based

Adheres to FHIR standards and Da Vinci Clinical Data Exchange (CDEX) Implementation Guides.

Scalable, flexible architecture

As a component in our TriZetto Unify strategy, this solution leverages a flexible, reusable framework that supports intelligent routing and system-agnostic interfaces.

Cost efficiency

Our SaaS-based model offers low upfront costs, faster implementation and per-transaction pricing. Your organization pays only when it uses the solution.

Deliver 21st century member experiences

The TriZetto Payer Clinical Data Exchange Solution helps you deliver the high-quality care and experiences your members expect while improving processes and reducing costs by enabling access to patient information.
