TriZetto Optimization Software Products

In a constantly changing healthcare environment, healthcare organizations need tools that will automate, standardize and support data management processes to drive greater administrative efficiency and help maintain data integrity.

The TriZetto® Optimization Software Products suite includes value-added applications designed specifically to automate the IT administrative processes associated with core operating systems. These include migrating and managing configurations, creating and using test data, controlling security data and improving the auto-enrollment process.

Cognizant's TriZetto Optimization Software Products:

- Enable the shift away from ad hoc projects and toward the automation of complex processes
- Reduce the time and expense required to manage business-configuration demands
- Assist with quality outcomes by supporting change management

Cognizant's TriZetto Optimization Software Products term license bundles

Configuration suite

- **Configuration migration utility**
Selectively migrate and load Facets configuration changes
 - **Keyword loader**
Enables quick and accurate Facets data migrations, loads, and updates
 - **Supplemental mapping management**
Create and edit Facets supplemental processing rules
 - **QNXT™ Configuration Solution**
Edit and migrate QNXT configuration data
 - **Configuration Orchestrator**
Translate and load custom figurations to core administrative systems
-

Production suite

- **Facets® Security Manager**
Manages Facets user security provisioning
 - **Facets Enrollment Toolkit**
Automates electronic enrollment of new members
 - **CareAdvance® Connect**
Enables offline capture of health assessments for CareAdvance
 - **Advanced Batch Framework**
Better manages and oversees batch processing
-

End-to-End Testing Solution

- **Intelligent Test Orchestrator**
Comprehensive, AI-powered QA testing solution that requires only a single input to execute complete testing, from start to finish

Test data management suite

- **Configuration Data Analyzer**
Analyzes claim data for test use case fulfillment
- **Test Data Generator**
Clones randomized non-production data sets
- **Synthetic executable enterprise data**
Creates PHI-free and better-than-production member and claim data
- **EDI Transaction Generator**
Create compliant 834s, 837s and other file formats

Testing automation suite

- **Claim Test Pro**
Executes thousands of claim processing use cases
- **Testing Automation Suite**
Automated testing and validation solution

Third-party interfaces

- **ECHO**
- **Zellis**
- **Lyric Secondary Editing**

Data Archiving Solution

- **TriZetto Data Archiving Solution**

Secure, configurable archival for core and custom tables in Facets and QNXT—improving system performance, reducing storage costs and supporting compliance

Archiving capabilities

- **Configurable and platform agnostic**
Define source, destination and archival parameters across multiple TriZetto products
- **Policy-based archival**
Create and apply entity-specific policies for archival, restoration and purge operations
- **Flexible runtime setup**
Schedule time-based archiving to minimize user and batch process contention
- **Supports core and custom tables**
Archive both standard and custom tables while maintaining data integrity
- **UI and batch options**
Configure and initiate archival through an intuitive interface or automated batch processes
- **Database insights**
View database and table sizes to guide archival planning and optimization

Optimization Software Products suite: Efficiency and security

Greater efficiency reduces staffing pressure

- Remove manual work
- Build environments specific to user needs
- Raise portability by reusing previous work on new use cases
- Build environments as large, complex, nuanced as needed

Fundamentally redesigned, faster processes

- One-touch, end-to-end QA testing solution simplifies and speeds configuration testing
- Automation and better-than-production data
- Optimized production and testing reduces turnaround

Preserving privacy, security and compliance

- Improve quality and oversight (auditability)
- Non-production environments aren't exposed to PHI
- Robust security management avoids noncompliance, fines

Cognizant's TriZetto Optimization Software Products help payers automate IT administrative processes

50%	Decrease in time spent on configuration changes QNXT Configuration Solution	50%	Reduction in time to execute regression testing Testing Automation Suite
70%	Reduction in time to generate EDI data EDI Transaction Generator	100%	Reduction in batch schedule processing wait states Advanced Batch Framework
50%	Less time spent on security audits Facets Security Manager	Up to 99%	Reduction in manual copy and re-entry efforts Supplemental mapping management
25% 50%	Time savings on user management Facets Security Manager	50% 75%	Reduction in time spent on managing qualifier groups in Facets Supplemental Mapping Management

We've combined our Optimization Software Products into term license bundles that, for a single, fixed annual fee, provide tools for TriZetto Facets customers or tools for TriZetto QNXT customers.

The TriZetto Optimization Software Products suite is part of the Cognizant line of TriZetto Healthcare Products—a portfolio of software products that helps healthcare organizations enhance revenue growth, drive administrative efficiency, improve cost and quality of care, and improve the member and patient experience.

Cognizant helps engineer modern businesses by helping to modernize technology, reimagine processes and transform experiences so they can stay ahead in our fast-changing world. To see how Cognizant is improving everyday life, visit them at www.cognizant.com or across their socials @cognizant.
