

Data sheet

TriZetto® QNXT™ Dental

Proven efficiency, ongoing innovation.

Today's sophisticated dental plans demand technology solutions that can support increasingly complex designs that may include diagnostics, preventive care, predeterminations, routine checkups, restorative care and emergency dental treatment.

Advanced functionality and scalability

TriZetto QNXT software is a proven core administration system that supports the full range of dental managed care and fee-for-service benefit plans for individuals, commercial employees and

retirees, as well as government programs such as Medicaid. QNXT software is part of the Cognizant line of TriZetto® Healthcare Products—a portfolio of software products that helps healthcare organizations enhance revenue growth, drive administrative efficiency, improve cost and quality of care, and improve the member and patient experience.

TriZetto® QNXT™ software provides dental plans with automation and efficiency in these key areas:

- Predetermination management
- Claims processing and adjudication
- Provider administration
- Member administration
- Benefit plan and policy administration

Increase efficiency with dental-based claims processing and adjudication

QNXT software gives dental providers access to functionality that simplifies dental configurations, automates workflows and increases autoadjudication. Its unique dental features—userdefined criteria, prevention of payment for duplicate services, services unbundling, and definitions of replacement procedures and time parameters associated with service limits—help increase administrative efficiency.

Improve member and provider satisfaction

The QNXT system processes predeterminations and seamlessly converts them to claims, streamlining the process and reducing unnecessary, duplicative administrative effort. Dental payers can instantly access information on patient coverage/non-coverage, with detailed explanations. Costs for care can be shared with members prior to service delivery, significantly improving customer satisfaction.

Optimize management of provider and member information

The provider application within QNXT software enables dental plans to efficiently manage information regarding dental providers and their relationships with other providers in the dental community, as well as their contractual relationships and membership assignments. The system's advanced database design lets you easily store, view and maintain provider certifications, as well as payment, claim and call

history. Credentialing verification capabilities capture licensing, malpractice, education and Drug Enforcement Administration information.

Meet your dental business needs today and tomorrow

QNXT software provides dental-specific functionality that simplifies configurations, automates workflows and increases autoadjudication rates, as well as helps improve member and provider satisfaction by predetermining coverage and calculating out-of-pocket expenses. Bring new dental products to market quickly and easily with QNXT software's highly configurable interface.

QNXT software is a comprehensive enterprise solution that automates and simplifies dental information processing to deliver a low total cost of ownership.

Reach your objectives faster

In addition to the TriZetto QNXT dental solution, we offer an extensive line of solutions and services that harnesses the power of digital to optimize your business. Achieve new levels of performance and efficiency with digital business, digital operations, and digital systems and technology capabilities from Cognizant.
