Cognizant®

What if you could improve the prior authorization process with real-time validation and automation that dramatically reduce delays and expense?

Start to finish, prior authorization has never been easier and more effective at solving the challenges of delivering high quality, timely, cost effective care while simultaneously streamlining payer-provider workflow.

SaaS

Get up and running quickly with SaaS: no big upfront investment, and all maintenance and upkeep are done for you

Real-time integration

with core systems means immediate answers, no unnecessary care delays, and fast accurate adjudication

Reduce delays

With TTAP, health plans can reduce delays, denials, appeals, and speed adjudication. A win-win for everyone

Integrated Workflow

with clinical guidelines makes quick and easy work for providers and "touchless" for health plan utilization managers

TriZetto® Touchless Authorization Processing (TTAP)
