

## Switch On Cloud Computing for More Agility, Flexibility and Cost Savings

Cognizant IT IS Cloud Services give you all the elastic computing power you need to respond flexibly, affordably, virtually, now.

### No More Excuses

Cloud computing services have catapulted into a position of prime importance in any IT strategy. As a utility-based service, cloud computing allows organizations to dynamically address business requirements through asset-light, on-demand compute, storage and network resource provisioning. However, the transformation from physically centralized to virtually distributed IT environments often causes organizations to stumble, hesitate and delay. No more.

Our IT IS cloud services represent the comprehensive cloud service portfolio you need to achieve a seamless, efficient and affordable transition to conducting your business in the cloud.

### Four Key Services to Get You There

Our cloud services embrace everything you need to make the transition now, with a minimum of risk, from cloud infrastructure consulting to our multitenant and private clouds or outsourced cloud management services.

#### Cloud Infrastructure Consulting Services

Our proven design, build and deploy expertise will ensure you gain a dynamic, enterprise-strength IT infrastructure solution based on the latest virtualization and cloud orchestration technology. Solutions span entry-level virtual infrastructure, multitenant, private and hybrid cloud deploy-

ments, along with the mission-critical business applications you need to take full advantage of the investment. Cloud infrastructure services include:

- **Assessment:** Full analysis of the best cloud environment for your enterprise, including strategic roadmaps detailing infrastructure maturity, cloud migration, automation, business-critical applications and licensing.
- **Design:** Architecture designs cover private, multitenant and hybrid environments in alignment with business goals and vendor optimization. We can also review, validate and enhance existing designs.
- **Enablement:** Build and deploy cloud designs hosted within an environment you control, or on external clouds hosted in our data centers.
- **Integration:** Deploy and optimize business-critical applications on cloud infrastructures and enable virtual desktop infrastructure solutions for centralized control, security, patching and monitoring.

#### Cloud Infrastructure Services

Leveraging our data center capabilities to deliver enterprise-grade cloud infrastructures, our cloud infrastructure services include:

- **Dedicated data center service:** A customized, fully managed private cloud offering hosted by us, including facilities, network, security, compute, storage, end-user portal and area network connectivity.

- **Virtual data center service:** Our fully managed, multitenant cloud infrastructure, including facilities, network, security, compute, storage, end-user portal and area network connectivity.
- **Virtual desktop infrastructure service:** Provides secure enterprise management for virtual desktops, including encapsulation to support bring your own device (BYOD) and employees working from home.

#### Cloud Infrastructure Management Services

Leverage our proven remote infrastructure management (RIM) services to oversee your own private clouds or third-party-provided public clouds and gain access to these services:

- **Enterprise cloud management service:** Provides remote monitoring and management of physical and virtual private cloud infrastructures, including hypervisor and operating system (OS).
- **Public cloud management service:** Provides monitoring and management of virtual, third-party public cloud infrastructures to the OS level, along with vendor management.
- **Hybrid cloud management service:** Manages and coordinates hybrid, private and third-party public cloud environments, including physical and virtual cloud infrastructure, as well as hypervisor and OS.

#### Cloud Automation and Policy Management Service

Utilizing our proprietary Cloud360® enterprise-class cloud management automation system, you'll deploy applications to the cloud service that adhere to your corporate policies and business level and service level agreements. Cloud360 efficiently provisions, manages and monitors diverse cloud operations within your existing IT environment or to public cloud services. This seamless service management layer between applications and infrastructure enhances agility, operational efficiency, IT governance and component integration across the enterprise.

#### Why Cognizant

In a competitive marketplace, where "time to market" is everything and the cost of doing business is always an issue, you need to choose the right cloud services provider the first time around. Our IT IS Cloud Services allow you to harness the benefits of cloud computing now.
