

Cognizant

Passion for building stronger businesses

Environmental Policy

We will pursue sustainable growth with environment friendly practices and responsible use of natural resources. We will achieve this by:

- Having a deep commitment to run business by promoting a strong environment friendly culture towards responsible and sustainable growth
- Complying with applicable legal and other requirements to which the organization subscribes which relate to its environmental aspects
- Complying with industry best practices and supporting voluntary national and international climate change policies, protocols and initiatives
- Conserving resources, improving energy efficiency, reducing pollution, reducing waste, recycling and disposing waste in a responsible manner
- Implementing environmentally responsible procurement processes to realize environmental objectives
- Communicating with associates, suppliers and other relevant stakeholders to disseminate organization's environmental objectives and performance
- Continually measuring environmental impacts and exceeding targets to reduce impact on the environment

Occupational Health & Safety Policy

We will continuously strive to achieve excellence in implementing best-in-class Occupational Health and Safety practices.

We will adhere to the highest standards of Occupational Health and Safety by pioneering path-breaking practices, leveraging well-defined organizational policies and exceeding statutory requirements.

We are deeply committed to a strong organizational culture of consistently upholding, harnessing and enhancing Cognizant's Occupational Health and Safety management standards and practices.
