Everest Group PEAK Matrix® for Revenue Cycle Management (RCM) Operations Service Provider 2022

Focus on Cognizant
July 2022
Background of the research
Revenue Cycle Management (RCM) Operations PEAK Matrix® Assessment 2022

The onset of the pandemic led healthcare providers, already battling administrative inefficiencies, into a financial tailspin because elective surgeries were halted and footfall reduced, as patients chose to avoid healthcare facilities. Although the volumes are steadily bouncing back to pre-pandemic levels, the unprecedented talent shortage heightened by the pandemic is posing severe challenges for healthcare providers, as roles within revenue cycle operations have been adversely impacted. The financial burden on providers is acutely escalating with soaring wage costs and efforts to retain talent. This has steered healthcare providers into rethinking their RCM strategy to future-proof their operations from such unexpected disruptions.

As a part of this strategy overhaul, healthcare providers have become more open toward outsourcing and even offshoring, as they seek assistance from third-party providers to alleviate cost pressures and ensure the continuity and consistency of operations. Along with cost-arbitrage, healthcare providers are also seeking transformation of their revenue cycle function through technology adoption to reduce the dependency on talent and streamline operations. This report deep dives into the capabilities of leading RCM BPS players that are aiding healthcare providers in these uncertain times.

The full report includes the profiles of the following 31 leading RCM BPS providers featured on the RCM operations PEAK Matrix®:

- **Leaders:** Access Healthcare, AGS Health, Cognizant, GeBBS, Omega Healthcare, Optum, and Sutherland Global Services
- **Aspirants:** 3Gen Consulting, ACN Healthcare, ACU-Serve, GetixHealth, and Prochant

Scope of this report
- **Geography:** Global
- **Providers:** 31
- **Services:** RCM BPS
Everest Group Revenue Cycle Management (RCM) operations PEAK Matrix® characteristics

Leaders:
There are seven providers in the Leaders category – Access Healthcare, AGS Health, Cognizant, GeBBS, Omega Healthcare, Optum, and Sutherland Global Services.
- Leaders have established themselves as front-runners to support healthcare providers in their end-to-end operations of the RCM value chain spanning patient access, medical billing, claims management, and A/R management
- Leaders have focused on ramping up their talent pool and technological investments to cater to the increased demand for outsourcing. The talent shortages and cost pressures heightened by the pandemic are the primary reasons for this increased push in outsourcing in the RCM space

Major Contenders:
- While Major Contenders’ coverage of the RCM value chain may not be as comprehensive as that of Leaders, they have consolidated their capabilities in certain areas of the value chain through investments in people, process, and technology
- Partnerships with technology vendors are leveraged by Major Contenders to strengthen their offerings and to build capabilities to serve a balanced portfolio of clients

Aspirants:
3Gen Consulting, ACN Healthcare, ACU-Serve, GetixHealth, and Prochant are the Aspirants on the RCM operations PEAK Matrix®.
- Aspirants need to build a robust partnership ecosystem to enhance their technical and domain expertise and diversify their presence across buyer segments
- Increasing their visibility among buyers by showcasing relevant case studies of serving specific buyer segments needs to be a focus area for Aspirants

Overview

Company overview
Cognizant Technology Solutions Corporation is a publicly traded firm founded in 1994 as a technology development arm of The Dun & Bradstreet Corporation. With 100+ delivery centers and over 330,000 employees, Cognizant is a member of the NASDAQ-100, the S&P 500, and the Forbes Global 2000. With 25+ years of providing IT Services to clients in North America and across the globe, Cognizant is a leading provider of IT, business consulting and business process services. Cognizant offers services to clients across industries such as healthcare, life sciences, banking, financial services, manufacturing, retail, logistics, communication, media, and entertainment.

Headquarters: Teaneck, New Jersey
Website: www.cognizant.com

Key leaders
- Brian Humphries, Chief Executive Officer
- Jan Siegmund, Chief Financial Officer
- Ganesh Ayyar, President, Cognizant Digital Operations
- Samir Malhotra, Global Head of Delivery, Cognizant Digital Operations
- Giri Namala, Vice President, Global Markets, Healthcare BPS
- Brent Barber, Vice President, Onshore & Offshore Delivery, Healthcare

Suite of services
- Full cycle RCM
- Patient access
- Coding
- Charge capture
- CDI
- Provider RCM support software suite
- A/R management
- Self pay
- Bad debt
- Complex claims
- Clearing house services

#### Strengths

- Cognizant offers end-to-end capabilities in the RCM value chain. The firm further supplements these offerings with its clearinghouse and care delivery capabilities, thereby providing clients with an integrated RCM offering.
- Technology lies at the center of Cognizant’s RCM strategy. The firm has developed a strong arsenal of technological offerings, with multiple analytical and automation solutions such as ML-based coding error prediction and reducing rework for claims submission. Technology solutions from Bolder and TriZetto Provider Solutions further augmented its offerings.
- Enterprises are increasingly expecting service providers to operate on a risk-sharing model and provide flexibility in pricing constructs to ease their financial pressures. Cognizant, with its varied commercial constructs and outcome-based models, is well-positioned to rise to this challenge.

#### Limitations

- Cognizant has a limited pool of coding talent in comparison to its peers, and a major slice of its coders are predominantly focused on outpatient work. This might put Cognizant on the backfoot, as over the years, enterprises have started leveraging service providers for more complex inpatient coding work as well.
- Cognizant’s client mix is skewed toward smaller physician groups and independent hospitals. Large health networks looking to outsource their RCM operations should carefully evaluate Cognizant’s proficiencies in serving the specific needs of the buyer segment.
Appendix
Everest Group PEAK Matrix® is a proprietary framework for assessment of market impact and vision & capability

Everest Group PEAK Matrix

- **Leaders**
- **Major Contenders**
- **Aspirants**

### Vision & capability
(Measures ability to deliver services successfully)

### Market impact
(Measures impact created in the market)

- **High**
- **Low**
Services PEAK Matrix® evaluation dimensions

Measures impact created in the market – captured through three subdimensions:

- **Market adoption**
  - Number of clients, revenue base, YoY growth, and deal value/volume

- **Portfolio mix**
  - Diversity of client/revenue base across geographies and type of engagements

- **Value delivered**
  - Value delivered to the client based on customer feedback and transformational impact

Measures ability to deliver services successfully. This is captured through four subdimensions:

- **Vision and strategy**
  - Vision for the client and itself; future roadmap and strategy

- **Scope of services offered**
  - Depth and breadth of services portfolio across service subsegments/processes

- **Innovation and investments**
  - Innovation and investment in the enabling areas, e.g., technology IP, industry/domain knowledge, innovative commercial constructs, alliances, M&A, etc.

- **Delivery footprint**
  - Delivery footprint and global sourcing mix
Everest Group confers the Star Performers title on providers that demonstrate the most improvement over time on the PEAK Matrix®

Methodology

Everest Group selects Star Performers based on the relative YoY improvement on the PEAK Matrix.

In order to assess advances on market impact, we evaluate each provider’s performance across a number of parameters including:
- Yearly ACV/YoY revenue growth
- # of new contract signings and extensions
- Value of new contract signings
- Improvement in portfolio mix
- Improvement in value delivered

In order to assess advances on vision and capability, we evaluate each provider’s performance across a number of parameters including:
- Innovation
- Increase in scope of services offered
- Expansion of delivery footprint
- Technology/domain specific investments

We identify the providers whose improvement ranks in the top quartile and award the Star Performer rating to those providers with:
- The maximum number of top-quartile performance improvements across all of the above parameters AND
- At least one area of top-quartile improvement performance in both market success and capability advancement

The Star Performers title relates to YoY performance for a given vendor and does not reflect the overall market leadership position, which is identified as Leader, Major Contender, or Aspirant.
FAQs

Does the PEAK Matrix® assessment incorporate any subjective criteria?
Everest Group’s PEAK Matrix assessment adopts an unbiased and fact-based approach (leveraging provider / technology vendor RFIs and Everest Group’s proprietary databases containing providers’ deals and operational capability information). In addition, these results are validated / fine-tuned based on our market experience, buyer interaction, and provider/vendor briefings.

Is being a “Major Contender” or “Aspirant” on the PEAK Matrix, an unfavorable outcome?
No. The PEAK Matrix highlights and positions only the best-in-class providers / technology vendors in a particular space. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is itself a favorable recognition.

What other aspects of PEAK Matrix assessment are relevant to buyers and providers besides the “PEAK Matrix position”?
A PEAK Matrix position is only one aspect of Everest Group’s overall assessment. In addition to assigning a “Leader”, “Major Contender,” or “Aspirant” title, Everest Group highlights the distinctive capabilities and unique attributes of all the PEAK Matrix providers assessed in its report. The detailed metric-level assessment and associated commentary is helpful for buyers in selecting particular providers/vendors for their specific requirements. It also helps providers/vendors showcase their strengths in specific areas.

What are the incentives for buyers and providers to participate/provide input to PEAK Matrix research?
- Participation incentives for buyers include a summary of key findings from the PEAK Matrix assessment.
- Participation incentives for providers/vendors include adequate representation and recognition of their capabilities/success in the market place, and a copy of their own “profile” that is published by Everest Group as part of the “compendium of PEAK Matrix providers” profiles.

What is the process for a provider / technology vendor to leverage their PEAK Matrix positioning and/or “Star Performer” status?
- Providers/vendors can use their PEAK Matrix positioning or “Star Performer” rating in multiple ways including:
  - Issue a press release declaring their positioning. See citation policies.
  - Customized PEAK Matrix profile for circulation (with clients, prospects, etc.)
  - Quotes from Everest Group analysts could be disseminated to the media.
  - Leverage PEAK Matrix branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.).
- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with the designated POC at Everest Group.

Does the PEAK Matrix evaluation criteria change over a period of time?
PEAK Matrix assessments are designed to serve present and future needs of the enterprises. Given the dynamic nature of the global services market and rampant disruption, the assessment criteria are realigned as and when needed to reflect the current market reality as well as serve the future expectations of enterprises.
Everest Group is a research firm focused on strategic IT, business services, engineering services, and sourcing. Our research also covers the technologies that power those processes and functions and the related talent trends and strategies. Our clients include leading global companies, service and technology providers, and investors. Clients use our services to guide their journeys to maximize operational and financial performance, transform experiences, and realize high-impact business outcomes. Details and in-depth content are available at www.everestgrp.com.
