

Maximize the Value of Oracle Cloud Applications

Cognizant's Oracle Cloud Solution Provides a Roadmap to Accelerated Return on Investment

Oracle on the Cloud

Companies interested in utilizing state-of-the-market technology to manage and retain their workforce are rapidly turning to Oracle Cloud solutions to manage cost, improve functionality and maintain competitive flexibility. For this reason, Cognizant has developed a practical roadmap to help clients adopt Oracle Cloud solutions as a part of their current Oracle investment. Our approach eliminates many of the complications associated with upgrading an enterprise solution, or process-specific solution, to the cloud. To integrate business goals as part of an Oracle Cloud adoption program, engage the services of a trusted Oracle partner - Cognizant.

Oracle Cloud Roadmap Assessment

Cognizant has been working with clients for the past several years to implement Oracle Cloud solutions and, with our breadth of Oracle Cloud experience, we can provide the recommendations to meet any strategic vision.

Our Oracle Cloud Roadmap Assessment is a great first step in adopting options that capitalize on Oracle's state-of-the-market Cloud solutions.

Our experienced consultants work directly with client management and team members to assess pain points and how Oracle Cloud solutions might best serve organizational objectives. We're skilled in reviewing business processes to spot opportunities for streamlining work, tightening controls and adding efficiencies that save time and money.

How It Works

Cognizant provides complimentary (no cost) service of 3-5 days to develop an Oracle Cloud Roadmap. In our experience, an initial assessment benefits customers in understanding the value of Oracle Cloud applications. It provides a broader perspective on the migration benefits based on Total Cost-of-Ownership, rather than focusing on vertical solutions to specific pain points.

Our Oracle Cloud Roadmap Assessment adds value to the process by:

- Identifying current pain points and business objectives through collaborative working sessions.
- Demonstrating standard, out-of-the-box Oracle Cloud functionality and explaining the functionality roadmap.
- Leveraging our Cloud Accelerator, pre-configured business processes that performs high-level gap analysis for product fit.
- Summarizing the Oracle Cloud adoption roadmap and budgetary estimates for implementation.

Our Oracle Cloud Solution Accelerator

Designed to save time and money in launching an Oracle Cloud Solution, our Accelerator process offers:

- Preconfigured business processes, tools and templates adding to our Oracle Cloud Assessment tool, for a clearer analysis of how an Oracle Cloud solution fits specific business requirements.

- Exposure to standard out-of-box Oracle Cloud functionality.
- A quick proof-of-concept, mitigating risk.
- Access to our business-ready demo environment for product familiarization.

Key Benefits

- Assist decision-makers in assessing current Oracle investment and further optimizing ROI.
- Discover whether Oracle's Cloud fits business goals before investing significant time and money.
- Align business objectives against enabling technology before engaging in detailed technology discussions.
- Assess which problems can be solved and which cannot be, with Oracle Cloud solutions.
- Identify high-level benefits of adopting new processes versus maintaining existing customizations.
- Identify current pain points/gaps.
- Identify product and integration costs for viable roadmap alternatives.

Why Cognizant?

- Cognizant has 300+ Oracle Cloud Apps consultants, with a large pool of certified and trained implementation specialists under our Cloud Center of Excellence.
- A depth of Oracle Cloud Technology expertise and breadth of Oracle Cloud business consulting experience.
- Involved in HCM Cloud Payroll development for European localizations (NL, UK and IE).
- Awarded the Most Valuable Partner award from Oracle Corporation for being a strategic SI in Oracle Cloud Early Adopter Program.
- One of the first in the world to achieve OPN Specializations in Oracle Fusion HCM, Financials, CRM, Procurement and Project Portfolio Management.
- Strong relationship with Oracle Product Engineering and alliance partnership for smooth adoption of Oracle Cloud.
